

Programme Specification

MSc Epidemiology

LONDON
SCHOOL of
HYGIENE
& TROPICAL
MEDICINE

For prospectus details about the programme, please see www.lshtm.ac.uk/prospectus/masters/mse.html

AWARD DETAILS

Title and name of final award(s)

Master of Science (MSc) Epidemiology

Certificates awarded for the degree will state the following:

{Name}, having completed the approved course of study and passed the examinations has this day been admitted by *The London School of Hygiene and Tropical Medicine* to the University of London Degree of MSc Epidemiology. .

Level of the programme

All modules and awards offered under the programme are at Level 7 (also known as 'M' Masters level) of the Framework for Higher Education Qualifications in England, Wales & Northern Ireland (FHEQ).

For further information, please see

www.qaa.ac.uk/Publications/InformationAndGuidance/Documents/FHEQ08.pdf

Relevant QAA subject benchmark

Not applicable

For more information on subject benchmarking, please see

www.qaa.ac.uk/AssuringStandardsAndQuality/subject-guidance/Pages/Subject-benchmark-statements.aspx

Awarding body:

University of London

- **Registering body:** The London School of Hygiene & Tropical Medicine (LSHTM)
- **Examination body:** The London School of Hygiene & Tropical Medicine (LSHTM)

For more information on LSHTM and the University of London, please see www.lshtm.ac.uk and www.lon.ac.uk

Accreditation by professional or statutory body (if applicable)

Not accredited by any other body

Language of study and assessment

English

Please see 'English language requirements' further below regarding the standard required for entry.

ADMISSIONS INFORMATION

General entrance requirements

Applicants must normally satisfy LSHTM's general entrance requirements and additional programme-specific entrance requirements to be considered for admission. Applications must be submitted in accordance with the procedures and deadlines given in the web-based or printed prospectus.

- The normal **minimum** entrance qualification for registration is **at least** a second-class Honours

degree of a UK university, or an overseas qualification of an equivalent standard, or a registerable qualification in medicine, dentistry or veterinary studies appropriate to the programme. Applications with an appropriate technical qualification, or equivalent qualification and experience from overseas, are also welcomed.

- Additional usual requirements for the MSc Epidemiology are:
 - a student should also show evidence of numeracy skills (e.g. A level Mathematics or Statistics or a module with a good mark in their university degree)
 - an upper second-class honours degree of a UK university (or an overseas qualification of an equivalent standard) is usually required
 - it is preferable for a student to have some work experience in a health-related field
- Any prospective student who does not meet the above minimum entry requirement, but who has relevant professional experience, may still be eligible for admission. The Registry can advise on eligibility to apply in such cases.

For further information, please see www.lshtm.ac.uk/prospectus/howto/applforstudy.html

English language requirements

It is essential to have an excellent command of the English language to benefit from studying for the programme. All students will be required to obtain an acceptable score in an approved English language test if their first language is not English or if their studies at university have not been conducted wholly in the medium of English. Any English language tests must have been taken no more than two years before the date a student commences the programme. LSHTM may also request that an applicant take a test even if the above conditions have been met.

Acceptable tests and scores are as follows:

<u>Test</u>	<u>Minimum overall score</u>	<u>Minimum in written component</u>
IELTS General/Academic *	7.0	7.0
Pearson Test of English (PTE Academic)	68	68
TOEFL Computer	250	5.0
TOEFL Internet	100	24
TOEFL Written	600	5.0

* Regarding IELTS: in addition to a minimum 7.0 in the written component of the test, students **must** achieve a minimum score of 5.5 in each of the other three components (listening, reading and speaking).

For further information, please see www.lshtm.ac.uk/prospectus/english.html

Financial requirements

All students are required to have sufficient funds to cover programme tuition fees, living expenses and any travel and project costs for the duration of their studies. Tuition fees are payable in full on registration. The School is not able to provide financial assistance to any student whose funds prove to be inadequate at any stage during the programme. Students offered admission will be required to sign a financial declaration form confirming that they understand this situation and will have sufficient financial support for the duration of their studies. Evidence of available funds may be required.

For up-to-date information on fees and costs, please see www.lshtm.ac.uk/prospectus and click on 'Tuition fees'.

Students with disabilities (including dyslexia and mental health issues)

LSHTM welcomes applications from students with disabilities – which may include sensory impairment (visual/hearing), mobility or dexterity impairment, chronic medical conditions (e.g. diabetes, HIV, epilepsy, asthma) or chronic pain/fatigue, mental health difficulties, specific learning difficulties (e.g. dyslexia or dyspraxia), Aspergers Syndrome and other autism spectrum disorders, or any other

condition which has a long-term and adverse effect on studying.

The School aims to offer as much appropriate assistance as possible to accommodate individual needs, and will take all reasonable steps to ensure that both the application procedure and the programme itself are organised and delivered to offer all students the opportunity to participate fully.

Applicants are encouraged to disclose any specific disability at the time of application (via the 'Equal Opportunities' and 'Investigating Access' forms), and let the Registry know if anything further can be done to make the application and selection process as accessible as possible. This helps the School to ensure that applicants' specialist needs can be understood, and any obstacles minimised, throughout the application and admission process.

Once registered, the School can provide specific support to students with disabilities throughout their studies. Students are encouraged to disclose any disability from as early as possible; the Student Adviser can answer queries and provide confidential advice at any point. Any special arrangements, for example regarding examinations, may be made via the Student Adviser.

Please see further information at www.lshtm.ac.uk/prospectus/disability. Applicants should e-mail registry@lshtm.ac.uk with any specific queries. Registered students should contact disability@lshtm.ac.uk

Intake quota

There is no specific intake quota for the programme, but numbers admitted each year are limited. Applications for places are reviewed and any offer letters are issued in the order in which they arrive. Prospective students are therefore encouraged to apply as early as possible, as admittance to the programme may close up to several months ahead of the start of each new academic year. Applicants wishing to be considered for School scholarships are advised to apply by no later than the 1st of March for studies starting in September.

For information about sources of funding and scholarships, please see www.lshtm.ac.uk/prospectus/funding

PROGRAMME AIMS AND OBJECTIVES

Educational aims of the programme

The aim of the programme – consistent with LSHTM's mission to improve health worldwide – is to equip students with the knowledge and skills to make valuable contributions to both epidemiological research and public health. Epidemiological methods underpin clinical medical research, public health practice and health care evaluation to investigate the causes of disease, and to evaluate interventions to prevent or control disease. Epidemiology is a key discipline for understanding and improving global health. This course covers both communicable and non-communicable disease epidemiology.

By the end of this course, students should be able to:

- demonstrate advanced knowledge and awareness of the role of epidemiology and its contribution to other health-related disciplines;
- choose appropriate designs and develop detailed protocols for epidemiological studies;
- enter and manage computerised epidemiological data and carry out appropriate statistical analyses;
- assess the results of epidemiological studies (their own or other investigators'), including critical appraisal of the study question, study design, methods and conduct, statistical analyses and interpretation.

For further information, please see www.lshtm.ac.uk/prospectus/masters/mse.html

Learning, teaching and assessment methods

The programme is taught through a variety of teaching methods including: lectures, small group

seminars, computing practicals, and groupwork with peers. All elements of the programme have specific learning objectives, with content designed to help students achieve these outcomes. Students are expected to learn through both directed and self-directed study.

The programme is assessed through individual module assessments (which may include essays, other written coursework, short written exams, practical exams, groupwork, presentations or other methods), formal summer exams, and a project report. Such tasks are designed to assess, via the most appropriate method, whether learning objectives have been met.

For further information, please see www.lshtm.ac.uk/edu/qualityassurance/qualitymanagement.html

Learning outcomes

By the end of the programme, students will be expected to achieve the following learning outcomes – drawing on material taught across different elements and assessed in a variety of ways.

<u>Learning outcome</u>	<u>Programme element</u>	<u>Assessment methods</u>	<u>Other points to note</u>
(i) Demonstrate advanced knowledge and understanding of the role of epidemiology, the major public health issues and epidemiology's contribution to other health-related disciplines.	Extended Epidemiology (2007); Epidemiology in Practice (2056); optional modules e.g. Genetic Epidemiology (2448), Epidemiology & Control of Communicable Diseases (2437) Epidemiology of Non-Communicable Diseases (2407) and the Global Health Lecture Series.	Unseen written exams (especially Extended Epidemiology); in-course assessment for optional modules.	In many optional modules students have the opportunity to work in multidisciplinary groups which facilitates this objective.
(ii) Choose appropriate designs and develop detailed protocols/grant applications for epidemiological studies.	Extended Epidemiology (2007); Study Design (2400). Project Reports.	Unseen written exams (Extended Epidemiology); In-course assessment is a research protocol (Study Design).	Choosing appropriate study design is also included in components of other modules and some summer projects
(iii) Enter and manage computerised epidemiological data.	Epidemiology in Practice (2056).	No formal assessment in Epidemiology in Practice module, although many elements are covered by students in undertaking their project report and in optional modules.	
(iv) Carry out appropriate statistical analyses of epidemiological data.	Statistics for EPH (2021); Statistical Methods in Epidemiology (SME, 2402); and the optional module Advanced Statistical Methods in Epidemiology (ASME, 2412). Also optional modules for specific topics: genetic epidemiology, infectious diseases.	Unseen written exams (Stats for EPH); data analysis reports for SME and ASME; many students undertake analysis of an epidemiological data set for their project report.	All students do a data analysis exercise in Statistics for EPH for formative assessment. SME has been compulsory since 2005-6.
(v) Assess the results of epidemiological studies, including critical appraisal of the study question, study design, methods and conduct, statistical analyses and interpretation.	Epidemiology in Practice; components of many other modules. Project Reports.	End of Term 1 formative assignment - critical appraisal of a journal paper; in-course assessment; project report.	
(vi) Evaluate critically their own work and studies conducted by other investigators.	Epidemiology in Practice; components of many other modules. Project Reports.	End of Term 1 formative assignment - critical appraisal of a journal paper; in-course assessment; project report.	A critical approach to the literature and their own study is a core part of the project report

For further information, please see the programme handbook.

Distinctive features of the programme

The mission of the School is to contribute to the improvement of health worldwide through the pursuit of excellence in research, postgraduate teaching, advanced training and consultancy in international public health and tropical medicine. The School has been active at the highest level in this for many years and has one of the largest groups of epidemiologists in the world.

Epidemiology is the key discipline underlying medical research, public health practice and health care evaluation. The understanding of its principles and practice is crucial for all people involved in the design or assessment of epidemiological studies and programme evaluation in developed and developing countries.

For further information, please see www.lshtm.ac.uk/prospectus/masters/mse.html

LEARNING TIME

Modes of study and duration of study

The main part of the programme is taught 'face-to-face' at LSHTM in London. There is also a limited opportunity to take some LSHTM modules via distance learning, as 'blended learning' options.

After the end of formal teaching in May, the final part of the programme is a period of up to three months intensive project work. Only under exceptional circumstances, and if there is appropriate LSHTM tutor supervision of any field work, the Course Director may approve that part or the whole of the project period may be spent away from the School, whether in the UK or abroad.

The programme may be taken on a full-time, part-time or split-study basis, as follows:

<u>Mode</u>	<u>Standard period of registration</u>	<u>Maximum period of registration</u>
Full-time (<i>involves attending the School five days each week during term-time</i>)	49 weeks	2 academic years
Part-time (<i>involves attending the School at least two days each week during term-time</i>)	1 year 49 weeks	3 academic years
Split study* (<i>involves attending the School five days each week during term-time, with a one-year gap part-way through the programme</i>)	1 year 49 weeks	3 academic years

The standard period of registration is also the minimum. Any exemptions from this must be agreed on an individual basis.

* Students taking the programme by split study over two years attend full-time for *part* of Year 1, then take a one-year break, and undertake the *remainder* of the programme in Year 2. The split can occur at any module or slot end-point between the end of Term 1 and the end of formal teaching in May, by prior arrangement with the Course Director. With split study, Paper 1 of the formal exams will normally be taken at the end of Year 2, but may be taken at the end of Year 1 **after discussion and agreement with the relevant Course Director**. Paper 2 must normally be taken at the end of Year 2, and the project report must normally be undertaken in Year 2.

Mode of study information is also given at www.lshtm.ac.uk/prospectus/mode_study.html

Estimated number of study hours

The programme comprises a total of 1,800 notional learning hours (180 UK credits at Masters level), based on a mix of contact teaching time, directed study, and self-directed study time plus assessment.

- It is generally expected that full-time students will spend on average 35-40 hours a week on study, including face-to-face sessions and private study. During term-time, each week will typically

include 30 hours of contact time within the School and 10 hours of self-directed study.

- Part-time students usually study approx. 18-20 hours per week over two years, including face-to-face sessions and private study. During term-time, each week will typically include 15 hours of contact time within the School and 5 hours of self-directed study.
- Split study is expected to require the same amount of study time as full-time study during periods of active registration at the School, but there is no required time commitment during the one-year break.

For further guidance on study patterns, please see the programme handbook.

CREDIT AND ASSESSMENT REQUIREMENTS

Credit scheme

The programme operates a credit system which is consistent with the Higher Education Credit Framework for England, and compatible with the European Credit Transfer and Accumulation System (ECTS). LSHTM credits are awarded for successful completion of modules and the project – all of which are at Level 7, Masters level, of the Framework for Higher Education Qualifications in England (FHEQ).

Award of the MSc degree is based on successfully obtaining 180 credits in total, equivalent to 90 ECTS credits. It is normally required that all credits be obtained from approved LSHTM modules.

Further information about the credit systems used by universities in the UK and Europe is available in:

- The Higher Education Credit Framework for England, www.qaa.ac.uk/Publications/InformationAndGuidance/Documents/creditframework.pdf
- The Framework for Higher Education Qualifications in England, www.qaa.ac.uk/Publications/InformationAndGuidance/Documents/FHEQ08.pdf
- The European Credit Transfer and Accumulation System, http://ec.europa.eu/education/lifelong-learning-policy/doc48_en.htm

Assessment

Assessment at LSHTM uses a Grade Point Average (GPA) scheme, running from 5 (excellent) to 0 (very poor fail) and with a pass threshold of 2 (satisfactory).

For students who have obtained sufficient credit and are hence due an award, degree classifications of Pass or Distinction are determined by combining grades from modules, exams and the project to calculate a degree GPA.

Details of how degree GPA is calculated, and the GPA required to obtain a Distinction, are given in the detailed award scheme for the programme at intra.lshtm.ac.uk/registry/regulations/taught_regulations/

Programme components and requirements

The programme is split into 3 major assessed components:

<i>When</i>	<u>Term 1 (Oct-Dec) plus summer exams</u>	<u>Terms 2 & 3 (Jan-May)</u>	<u>Term 3 (June-Sept)</u>
<i>What</i>	A range of taught modules of different sizes	5 individual taught modules	Research project
<i>Credits</i>	60 credits (awarded as a block)	75 credits (15 credits per module)	45 credits (a single piece of work)
<i>Assessment</i>	Unseen written exams in the summer (Papers 1 & 2)	In-course assessment for each module	Project report (max.10,000 words)
<i>Grades to be awarded</i>	Marks required: Papers combined = ≥ 2 , with	A minimum mark of 2 is required for each module; one module with a mark of 1 to	A minimum mark of 2 is required.

<i>credits</i>	Paper 1 = ≥ 1 and Paper 2 = ≥ 1	1.99 can be compensated provided the combined GPA for the 5 modules is ≥ 2	
----------------	--	---	--

Further general information about MSc programme structures is given at www.lshtm.ac.uk/prospectus/masters/masters.html

CALENDAR AND CURRICULUM

Study calendar

The academic year is broken up into three terms. Students are also expected to continue their studies (through reading, revision etc.) during the breaks between terms.

Term 1 (Autumn) runs from September to December (12 weeks total).

- There is a compulsory orientation and induction week for new students at the very beginning of the term.
- There is a compulsory two-day residential field trip at the beginning of Term 1
- Formal module teaching then runs for 5 weeks, followed by a Reading Week in early November (which may include some specific programme-level sessions), then a further 5 weeks of module teaching.

Term 2 (Spring) runs from January to March (11 weeks total).

- In the first 5 weeks, two modules are taken; one in the 'C1' slot running from Monday through to Wednesday morning, and one in the 'C2' slot running from Wednesday afternoon through to Friday.
- This is followed by a Reading Week in early February, which may include programme-level sessions.
- In the next 5 weeks, two more modules are taken; in the 'D1' slot running from Monday through to Wednesday morning, and in the 'D2' slot running from Wednesday afternoon through to Friday.

Term 3 (Summer) runs from April to September (5 weeks teaching, 2 weeks run-up to examinations, plus approximately 11 further weeks intensive project work).

- In the first 5 weeks, a final module is taken in the 'E1' slot running from Monday through to Wednesday morning; the rest of each week is set aside for revision, programme-level sessions and project work.
- After teaching finishes, there is a short gap for final revision ahead of exams in late May or early June.
- After the exams, project work should take place in earnest over the period from June to August, with a project report hand-in date at approximately the beginning of September.

Specific term dates are available at www.lshtm.ac.uk/aboutus/termdates ; more detailed guidance and deadlines are given in the programme handbook.

Modules

Modules are taken over all three terms. Those available through the programme are categorised as either compulsory (core modules), recommended (obvious choices highly relevant to the programme) or optional (alternative modules which may be more relevant to individual students' interests).

<i>Term</i>	<i>Compulsory modules</i>	<i>Recommended modules</i>	<i>Optional modules</i>
Term 1	<ul style="list-style-type: none"> • Clinical Trials • Epidemiology in Practice • Extended Epidemiology • Statistics for EPH 	<ul style="list-style-type: none"> • Introduction to Computing 	<ul style="list-style-type: none"> • Demographic Methods • Molecular Epidemiology of Infectious Diseases

Term 2, C1 slot	<ul style="list-style-type: none"> • Study Design: Writing a Study Proposal 		
Term 2, C2 slot	<ul style="list-style-type: none"> • Statistical Methods in Epidemiology 		
Term 2, D1 slot		<ul style="list-style-type: none"> • Epidemiology of Non-Communicable Diseases • Modelling & the Dynamics of Infectious Diseases • Social Epidemiology • Spatial Epidemiology in Public Health 	<ul style="list-style-type: none"> • Communicable Disease Control in Developed & Middle Income Countries • Current Issues in Safe Motherhood & Perinatal Health • Medical Anthropology in Public Health • Nutrition in Emergencies • Population, Poverty and Environment • Tropical Environmental Health
Term 2, D2 slot		<ul style="list-style-type: none"> • Environmental Epidemiology • Epidemiology & Control of Communicable Diseases • Genetic Epidemiology • Global Mental Health 	<ul style="list-style-type: none"> • Ethics, Public Health & Human Rights • Globalisation and Health • Nutrition Related Chronic Disease
Term 3, E-slot		<ul style="list-style-type: none"> • Advanced Statistical Methods in Epidemiology • Control of Reproductive Tract Infections / Sexually Transmitted Infections 	<ul style="list-style-type: none"> • AIDS • Integrated Vector Management • Principles and Practice of Public Health

Students who are interested in taking the module on Modelling & Dynamics of Infectious diseases will also need to take the course on the Epidemiology & Control of Communicable disease.

In addition:

- Training sessions covering areas like introduction to computing, basic maths skills, English for academic purposes, using library resources, study skills and more are offered during the programme of the year (most being available from early in Term 1).
- Students would be expected to also attend the Global Health Lecture Series which runs weekly during term-time in Terms 1 and 2.

Further details about modules are given in the programme handbook and in the LSHTM-wide module handbook available at www.lshtm.ac.uk/prospectus/msc_module_handbook

Formal summer examinations

The formal examinations held in Term 3 consist of two unseen written examinations, known as Papers 1 and 2. Each exam lasts three hours. Paper 1 primarily examines specific content from Term 1 teaching, while Paper 2 tests the ability to integrate knowledge acquired from across the whole of the programme.

Further details about summer exams are given in the programme handbook.

Project report

As the last major component of the programme, students undertake a research project on a relevant topic – assessed through a written-up report. The project should be an independent piece of work, appropriately guided and supported by a supervisor and other relevant staff. The topic should be

selected and a project proposal drawn up by the end of Term 2, for approval by the supervisor or personal tutor. Substantive work should start after the exams in the summer. The final report, to be submitted at the beginning of September, should be between 7,000 and 10,000 words long.

Criteria and further details about projects are given in the project handbook for the programme.

STUDENT SUPPORT, GUIDANCE AND RESOURCES

Student charter

LSHTM has a student charter which summarises the standards of service the School expects and aspires to offer students, as well as the standards of conduct which students should expect and aspire to follow in turn. Students and prospective students are encouraged to read this.

The LSHTM student charter is available at www.lshtm.ac.uk/edu/qualityassurance/student_charter.pdf. A general summary of support and services offered to students is given at www.lshtm.ac.uk/prospectus/servsupp.html

The student community

All students on the programme are members of the LSHTM Student Representative Council (SRC). The SRC provides a focus for student opinion and identity across LSHTM, through representation on committees and by acting as a link between staff and students. In addition, the SRC organises LSHTM-wide social and sporting events. Students are also able to use the facilities of the University of London Union (ULU).

Students on the programme elect representatives to liaise with staff and help communicate student views, as well as to help arrange social activities.

For further information, please see www.lshtm.ac.uk/src and www.ulucol.ac.uk

Personal tutors

Students on the programme are allocated a personal tutor who can provide both academic guidance and more general support or pastoral care. The personal tutor relationship is not about direct teaching – although tutors can recommend or arrange for their tutee to see other specific members of staff regarding specific academic matters. Personal tutors mainly act as a point of contact to discuss practical issues or questions regarding the programme, such as module choices or project selection, or as a first-line sympathetic ear for personal problems.

Further details about personal tutoring arrangements are given in the programme handbook.

Student advice and counselling

The Student Advice & Counselling Service offers advice and support for any practical or emotional issues students may experience during their time at LSHTM. The Student Adviser can offer impartial advice on a range of issues including accommodation, financial concerns and immigration. The Counsellor is available to talk to any student who is experiencing anxiety or stress, study-related or otherwise.

All appointments with the Student Adviser or Counsellor are strictly confidential, and no information volunteered by a student will be passed on to anyone else without permission.

For further information, please see <http://intra.lshtm.ac.uk/studentadvice>

Healthcare

LSHTM students can register with the Health Centre at 20 Gower Street (next to the main building), which offers an NHS GP (general practitioner) medical service and also a counselling service. Students who are not registered as patients can also access the services of the Health Centre during normal working hours.

For further information, please see www.gowerstreetpractice.org.uk

Learning resources and facilities

Students on the programme have access to comprehensive library and IT (computing) resources and facilities, as well as many other standard facilities such as the Refectory, common rooms, etc.

For further information, please see www.lshtm.ac.uk/library (Library) and www.lshtm.ac.uk/its (IT Services)

English language support

While all students are required to demonstrate English language proficiency in line with the School's minimum requirements in order to be accepted on the programme, LSHTM provides free 'English for Academic Purposes' classes aimed at students whose first language is not English and who would like further support in adjusting to the demanding standards of postgraduate university study in Britain.

For further information, please see intra.lshtm.ac.uk/edu/taughtcourses/studentresources/english.html

Further learning support

In addition to programme-level activities and academic support from personal tutors and teaching staff, LSHTM offers specific training sessions in areas such as basic maths skills and introductory-level computing. A series of study skills workshops are held throughout the year on topics such as effective reading and coping with exams. Students with disabilities such as dyslexia should contact the Student Adviser for appropriate guidance and support.

For further information, please see www.lshtm.ac.uk/edu/studyskills.html . Please also see earlier sub-section on 'Students with disabilities' regarding disability support.

Careers advice and resources

The School's Careers Service can provide confidential advice and guidance appropriate to the diverse needs of students at the School, from those with established careers who wish to change direction to those who have come from their first degree and are looking to establish a career. Advisers can assist on an individual basis (including help with career planning, CV writing and interview technique), in small groups, or through School-wide events (arranging regular careers fairs and forums, talks by speakers from relevant organisations, and workshops on essential career skills).

The on-site Careers Centre offers a central reference point for job vacancies, careers information and literature and employer information. The LSHTM Careers Service is also part of the Specialist Institutions' Careers Service (SICS) of the University of London Careers Group, and students can access their even more extensive resources.

For further information, please see www.lshtm.ac.uk/careers and www.careers.lon.ac.uk

PROGRAMME QUALITY

Quality evaluation and enhancement

The programme is subject to LSHTM's rigorous quality assurance processes, including both standard annual monitoring and an extensive special review every five years.

As students reach the end of the programme, they are asked to give specific feedback both via class discussion sessions and an end-of-programme survey. Feedback on other topics, including the content of specific modules as well as more general issues like Library facilities, will also be sought at intervals throughout the period of study. Such feedback is anonymised, analysed, discussed and followed up by appropriate committees and functions within the School.

Operation of the programme itself is overseen by a dedicated committee. A range of further LSHTM committees and functions are responsible for identifying and resolving any problems, improving programme quality and enhancing the student experience on an ongoing basis.

For further information, please see www.lshtm.ac.uk/edu/qualityassurance

AFTER GRADUATION

Possible routes to further study

Successful completion of the programme may serve as excellent preparation for students who wish to go on to take a higher degree, such as a PhD, DrPH or MPhil – whether to be undertaken at LSHTM or elsewhere.

For further information on research degrees at LSHTM, please see www.lshtm.ac.uk/prospectus/research

Possible graduate employment routes

The programme is suitable for those aiming for a career in medical research, public health and community medicine, epidemiological field studies, drug manufacturers, government or NGOs. It will also be of interest to those who are required to understand epidemiology such as medical journalists, and scientific officers in industry.

It may be noted that LSHTM has links with Epidemiology departments at other universities and academic centres, the MRC Clinical Trials Unit, the MRC Laboratories (the Gambia) and the MRC/UVRI Research Unit (Uganda), the World Health Organisation (WHO Collaborating Centre), UK Department of Health, UK National Health Service and NHS Graduate Scheme, UN High Commission on Refugees, International Committee of the Red Cross, Médecins Sans Frontières, Oxfam, GOAL, Merlin, International SOS, Save the Children, Malaria Consortium, Action Against Hunger, International Medical Corps, DOCS International, Emergency, Medair, Médecins Du Monde, the Bill & Melinda Gates Foundation, the Clinton Foundation HIV/Aids Initiative, the UK Health Protection Agency, UK National Institute for Health & Clinical Excellence, UK Office for National Statistics, Public Health Resource Unit, UK Civil Service Fast Stream, and amongst many other organisations.

For further information, please see www.lshtm.ac.uk/careers/resources/graduate_destinations.doc

The Alumni Association

Membership of the LSHTM Alumni Association is free and open to all former students of LSHTM. This is a diverse community of over 15,000 alumni in more than 180 countries, including local chapters, and with regular events, communications and opportunities to meet fellow alumni in many different parts of the world. The Association aims to provide past students with lifelong links to the School and each other, and is keen to foster a vibrant and active alumni community. All alumni are encouraged to register their details and participate further.

For further information, please see www.lshtm.ac.uk/alumni or email alumni@lshtm.ac.uk

ABOUT THIS DOCUMENT

This programme specification applies for the academic year 2011-2012

Last revised 27/07/2011 by Dorothea Nitsch and Punam Mangtani

This Programme Specification has been developed in line with the nationally agreed reference points for assuring the quality and standards of higher education in the United Kingdom, known as the Academic Infrastructure. For further information, please see www.qaa.ac.uk/AssuringStandardsAndQuality/Pages/default.aspx
