

1. Overview

Academic Year (student cohorts covered by specification)	2019-20			
Programme Title	Epidemiology			
Programme Director	Simon Cousens & Ian Douglas			
Awarding Body	University of London			
Teaching Institution	London School of Hygiene & Tropical Medicine			
Faculty	Epidemiology and Population Health			
Length of Programme (months)	MSc – Full time = 12 months, Part time = 24 months Exit awards: PGDip – Full time = 8 months, Part time = 16 months			
Entry Routes	MSc			
Exit Routes	MSc/PGDip			
Award Titles	MSc in Epidemiology (180 credits) Exit awards: PGDip in Epidemiology (120 credits)			
Accreditation by Professional Statutory and Regulatory Body	N/A			
Relevant PGT QAA Benchmark Statement and/or other external/internal reference points	Consistent with the Framework for Higher Education Qualifications at Masters level (level 7), this course will provide students with an understanding of the conceptual basis of epidemiology and with training in essential methodological skills for the design, conduct, and analysis of epidemiological studies, and in the interpretation and communication of their results. See pages 28-29 at: http://www.qaa.ac.uk/docs/qaa/quality-code/qualifications-frameworks.pdf?sfvrsn=170af781_14			
Level of programme within the Framework for Higher Education Qualifications (FHEQ)	All modules and awards offered under the programme are at Level 7 (also known as 'M' Masters level) of the Framework for Higher Education Qualifications in England, Wales & Northern Ireland (FHEQ). For further information, please see http://www.qaa.ac.uk/docs/qaa/quality-code/qualifications-frameworks.pdf?sfvrsn=170af781_14			
Total Credits	CATS:	180	ECTS:	90
HECoS Code	tbc			

Mode of Delivery	The main part of the programme is taught 'face-to-face' at LSHTM in London. There is also a limited opportunity to take some LSHTM modules via distance learning, as 'blended learning' options.
Mode and Period of Study	Full time (12 months) or part time/split time (max 24 months)
Cohort Entry Points	Annually in September
Language of Study	English
Re-sit Policy	https://www.lshtm.ac.uk/sites/default/files/Resits_Policy_Policy_Procedure.pdf
Extenuating Circumstances Policy	https://www.lshtm.ac.uk/edu/taughtcourses/exams_assmt_staff/extenuating_circumstances_policy.pdf
Programme Description	<p>This programme equips students with the knowledge and statistical skills to make valuable contributions to medical research as well as public health in low-, middle- and high-income countries. Epidemiological methods underpin clinical medical research, public health practice and health care evaluation to investigate the causes of disease and to evaluate interventions to prevent or control disease.</p> <p>For further information, please see www.lshtm.ac.uk/study/masters/mse.html</p>
Date of Introduction of Programme (month/year)	September 1979
Date of production / revision of this programme specification (month/year)	June 2018

2. Programme Aims & Learning Outcomes

Educational aims of the programme
<p>The aim of the programme – consistent with LSHTM's mission to improve health worldwide – is to equip students with the knowledge and skills to make valuable contributions to both epidemiological research and public health. Epidemiological methods underpin clinical medical research, public health practice and health care evaluation to investigate the causes of disease, and to evaluate interventions to prevent or control disease. Epidemiology is a key discipline for understanding and improving global health. This course covers both communicable and non-communicable disease epidemiology, and has a substantial statistical component.</p>

Programme Learning Outcomes
<p>By the end of the programme – drawing on material taught across different elements and assessed in a variety of ways, students will be able to:</p> <ul style="list-style-type: none"> i) demonstrate advanced knowledge and awareness of the role of epidemiology and its contribution to other health-related disciplines; ii) choose appropriate designs and develop detailed protocols for epidemiological studies; iii) enter and manage computerised epidemiological data and carry out appropriate statistical analyses;

- iv) assess the results of epidemiological studies (their own or other investigators'), including critical appraisal of the study question, study design, methods and conduct, statistical analyses and interpretation.

Teaching and Learning Strategy

The programme is taught through a variety of teaching methods including: lectures, small group seminars, computer practicals, and group work with peers. All elements of the programme have specific learning objectives, with content designed to help students achieve these outcomes. Students are expected to learn through both directed and self-directed study.

Assessment Strategy

The programme is assessed through individual module assessments (which may include essays, other written coursework, short written exams, practical exams, group work, presentations or other methods), formal summer exams, and a project report. Such tasks are designed to assess, via the most appropriate method, whether learning objectives have been met.

3. Programme Structure and features, modules, credit assignment and award requirements:

Full-time Masters	Term 1	Term 2	Term 3	Total Credits
Compulsory Modules	4	2	0	90
Recommended Modules	0	2	1	45
Projects			1	45

Any optional (i.e. recommended non-compulsory) modules listed are indicative and may change from year to year for reasons including staff availability, student demand, and enhancements to programmes as part of ongoing review. <https://www.lshtm.ac.uk/study/courses/changes-courses>

Term	Slot	Module Code	Module Title	Module Type (compulsory or recommended)	Credits (CATS)	Contact hours
1	AB1	2033	Clinical Trials	Compulsory	10	30
1	AB1	2056	Epidemiology in Practice	Compulsory	20	60
1	AB1	2007	Extended Epidemiology	Compulsory	15	55
1	AB1	2021	Statistics for EPH	Compulsory	15	70
2	C1	2400	Study Design: Writing a Study Proposal	Compulsory	15	20
2	C2	2402	Statistical Methods in Epidemiology	Compulsory	15	38.5
2	D1	2407	Epidemiology of Non-Communicable Diseases	Recommended	15	30
2	D1	2464	Modelling & the Dynamics of Infectious Diseases	Recommended	15	60
2	D1	2472	Social Epidemiology	Recommended	15	40
2	D1	3135	Spatial Epidemiology in Public Health	Recommended	15	50
2	D2	1301	Environmental Epidemiology	Recommended	15	30
2	D2	2437	Epidemiology & Control of Communicable Diseases	Recommended	15	63
3	E	2412	Advanced Statistical Methods in Epidemiology	Recommended	15	48

4: Entry Requirements

Criteria for admission
<p>General entrance requirements</p> <p>Applicants must normally satisfy LSHTM's general entrance requirements and additional programme-specific entrance requirements to be considered for admission. Applications must be submitted in accordance with the procedures and deadlines given in the web-based or printed prospectus.</p> <p>In order to be admitted to a postgraduate taught degree programme of the London School of Hygiene & Tropical Medicine, an applicant must:</p> <p>a) hold a first degree at Second Class Honours standard in a relevant discipline, a registrable qualification appropriate to the course of study to be followed, in medicine, dentistry or veterinary studies, or another degree of equivalent awarded by an overseas institution recognised by UK Naric or Barrons.</p> <p>OR</p>

b) hold a professional qualification appropriate to the programme of study to be followed obtained by written examinations and judged by the School to be equivalent to a Second Class Honours degree or above.

OR

c) have relevant professional experience or training which is judged by the School to be equivalent to a Second Class Honours degree or above.

AND

satisfy any additional requirements where prescribed for admission to a specific programme.

Entry to the MSc Epidemiology is highly competitive and applicants are recommended to have a second-class honours degree from a UK university, or an overseas qualification of an equivalent standard. Additional usual requirements for the MSc Epidemiology are also:

a) that a student should also show evidence of numeracy skills (e.g. A level Mathematics or Statistics or a module with a good mark in their university degree)

b) that it is preferable for a student to have some work experience in a health-related field.

For further information, please see <https://www.lshtm.ac.uk/study/frequently-asked-questions/london-based-msc-admissions-faqs>

English language entry requirements

Band A

It is essential that all students have a good command of the English language to benefit from their studies at the School.

As part of the application process, applicants are required to demonstrate how they meet the School's minimum English language requirements. This is particularly important for applicants requiring a Tier 4 Student visa, as the UK Home Office dictates that every student from outside the UK and European Union (EU) must show evidence of a minimum level of English language ability (called CEFR1 B2 level), in order for a Tier 4 Student visa to be issued for entry to the UK.

Additionally, the School asks applicants to have minimum English language proficiency levels that are necessary for our academic programmes. These levels are higher than the CEFR B2 minimum level and also apply to EU applicants, although these will not normally require a Tier 4 Student visa.

The academic English language requirements for each of the School's programmes are categorised into one of three profiles A, B or C. For information on these three profiles, please refer to the LSHTM English Language Requirement Policy: <https://www.lshtm.ac.uk/files/english-language-requirements.pdf>
