| <b>Target Audience</b>                                             | This module is intended for students wanting to develop their theoretical and practical understanding of qualitative methods in health research. It is designed primarily for those studying MScs for which an empirical project is required (that is, those students working on their own qualitative study), and for Research Degree students. It will also be appropriate for external students intending to develop their understanding of qualitative methodology. |
| <b>Module Description</b>                                          | This module aims to develop skills and understanding in the design, conduct and use of qualitative research. The module addresses the following topics:                                                                                                                                                                                                                                                                                                                 |

|                                                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| <b>Last Revised (e.g. year changes approved)</b> | August 2026                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| <b>Programme</b>                                    | <b>Status</b> |
|-----------------------------------------------------|---------------|
| This module is linked to the following programme(s) |               |
| Public Health                                       | Recommended   |
| Public Health for Global Practice                   | Recommended   |
| Tropical Medicine and International Health          | Recommended   |

## Module Aim and Intended Learning Outcomes

| <b>Overall aim of the module</b>                                                                                                                                                                                              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>The overall module aim is to:</p> <ul style="list-style-type: none"> <li>To develop students' understandings of the principles and practices of using qualitative methods in health and health policy research.</li> </ul> |

| <b>Module Intended Learning Outcomes</b>                                                                                                                                                                                                                                                                                                     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Upon successful completion of the module a student should be able to:</p> <ol style="list-style-type: none"> <li>Identify appropriate qualitative designs for health research</li> <li>Assess the advantages and disadvantages of a range of data generation methods</li> <li>Understand different approaches to data analysis</li> </ol> |

## Indicative Syllabus

### Session Content

The module is expected to cover the following topics:

- Principles of qualitative research: Assumptions about the social world and how to research it; debates in the use of qualitative research in policy orientated qualitative work; different theoretical approaches informing qualitative research; research ethics specific to qualitative research.
- Data generation methods: Producing interview data, but also use of visual methods ; ethnographic approaches; developing interview skills; researcher reflexivity and field notes; participatory and remote methods of data generation
- Analysing data: Approaches to data analysis (thematic and grounded analysis) (Note: there are no practical sessions on computer aided analysis).

## Teaching and Learning

### Notional Learning Hours

| Type of Learning Time           | Number of Hours | Expressed as Percentage (%) |
|---------------------------------|-----------------|-----------------------------|
| Contact time                    | 25              | 19%                         |
| Directed self-study             | 25              | 13%                         |
| Self-directed learning          | 50              | 34%                         |
| Assessment, review and revision | 50              | 34%                         |
| <b>Total</b>                    | <b>150</b>      | <b>100%</b>                 |

Student contact time refers to the tutor-mediated time allocated to teaching, provision of guidance and feedback to students. This time includes activities that take place in face-to-face contexts such as lectures, seminars, demonstrations, tutorials, supervised laboratory workshops, practical classes, project supervision as well as where tutors are available for one-to-one discussions and interaction by email.

The division of notional learning hours listed above is indicative and is designed to inform students as to the relative split between interactive and self-directed study.

### Teaching and Learning Strategy

The module comprises presentations from lecturers on key topics and facilitated seminar work. Students are expected to participate in all activities.

## Assessment

### Assessment Strategy

The assessment for this module has been designed to measure student learning against the module intended learning outcomes (ILOs) as listed above. Formative assessment methods may be used to measure students' progress. The grade for summative assessment(s) only will go towards the overall award GPA.

### Summative Assessment

| Assessment Type | Assessment Length (i.e. Word Count, Length of presentation in minutes) | Weighting (%) | Intended Module Learning Outcomes Tested |
|-----------------|------------------------------------------------------------------------|---------------|------------------------------------------|
| Essay           | 2000-word essay                                                        | 100%          | 1-3                                      |

### Resitting assessment

Resits will accord with Chapter 8a of the LSHTM Academic Manual

| Assessment being replaced | Approved Alternative Assessment Type                                                                                                                                                              | Approved Alternative Assessment Length (i.e. Word Count, Length of presentation in minutes) |
|---------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| Coursework                | Resit/deferred/new attempts - an essay answering one of two set questions, which would be based on the content covered in the module and different to those used in the original assessment task. | 1750-2000 word essay                                                                        |

## Resources

### Indicative reading list

*Please refer to the module reader for details. Essential texts for each session will be listed and available to access on the QM Moodle.*

### Key text to support the module overall

- Green, J and Thorogood, N (2018) *Qualitative Methods for Health Research*, 4<sup>th</sup> edition, Sage. *(there is no requirement to purchase this text. Any essential chapters will be made available)*

### Recommended reading to support the module overall

- Silverman, D (2013) *Doing Qualitative Research: A Practical Handbook*, 4<sup>th</sup> edition, Sage.

### Additional reading to support the module overall

- Charmaz, K. (2013) *Constructing Grounded Theory: A Practical Guide Through Qualitative Analysis*, London: Sage.
- Denzin, NK and Lincoln, Y (eds) (2017) *Handbook of Qualitative Research*, 5<sup>th</sup> edition, Sage.
- Mason, J (2018) *Qualitative Researching*, Sage, 3<sup>rd</sup> edition.
- Seale, C (2017) *Researching Society and Culture*, 4<sup>th</sup> edition, Sage.

### Other resources

Module Information can be found on the Virtual Learning Environment (Moodle) containing information about each session and key references for the module

## Teaching for Disabilities and Learning Differences

The module-specific site on Moodle gives students access to lecture notes and copies of the slides used during the lecture. Where appropriate, lectures are recorded and made available on Moodle. All materials posted on Moodle, including computer-based sessions, have been made accessible where possible.

LSHTM Moodle is accessible to the widest possible audience, regardless of specific needs or disabilities. More detail can be found in the [Moodle Accessibility Statement](#) which can also be found within the footer of the Moodle pages. All students have access to “SensusAccess” software which allows conversion of files into alternative formats.

Student Support Services can arrange learning or assessment adjustments for students where needed. Details and how to request support can be found on the [LSHTM Disability Support pages](#).
