

## MODULE SPECIFICATION

<b>Academic Year (student cohort covered by specification)</b>	2021-22
<b>Module Code</b>	IDM101
<b>Module Title</b>	Principles of Biostatistics and Epidemiology
<b>Module Organiser(s)</b>	Dr Gillian Stresman and Elmien Wolvaardt
<b>Contact email</b>	The LSHTM distance learning programmes and modules are run in collaboration with University of London Worldwide. Enquiries may be made via <a href="#">the Student Advice Centre</a> . (Enquiries from face-to-face i.e. London-based the LSHTM MSc or research students regarding study of DL modules should be emailed to <a href="mailto:distance@lshtm.ac.uk">distance@lshtm.ac.uk</a> .)
<b>Faculty</b>	Infectious & Tropical Diseases: The London School of Hygiene & Tropical Medicine <a href="https://www.lshtm.ac.uk/research/faculties/itd">https://www.lshtm.ac.uk/research/faculties/itd</a>
<b>FHEQ Level</b>	Level 7
<b>Credit Value</b>	<b>CATS:</b> 15 <b>ECTS:</b> 7.5
<b>HECoS Code</b>	101317:100406 (1:1)
<b>Mode of Delivery</b>	Distance Learning
<b>Mode of Study</b>	Directed self-study, through provided and online materials
<b>Language of Study</b>	English
<b>Pre-Requisites</b>	None
<b>Accreditation by Professional Statutory and Regulatory Body</b>	None
<b>Module Cap (Maximum number of students)</b>	None
<b>Target Audience</b>	This module is intended for those with an interest in infectious diseases who wish to carry out novel research in the field of human health or interpret data published with an aim to change or review policies relevant to public health.
<b>Module Description</b>	This module equips students with the knowledge and skills to analyse and interpret statistical results and epidemiological evidence in medical and public health literature. It is aimed at students with no previous experience in statistics or epidemiology and is assessed through a final exam. It is the first of the four core modules that constitute the basic foundation to the Infectious Diseases distance learning

	programme (and comprise the PG Cert in Infectious Diseases).
<b>Duration</b>	Distance learning module studies begin in early October. Students may start their studies at any time from receipt of study materials and work through the material until the start of the June examinations (although assessment submission deadlines which are earlier than this must be observed).
<b>Last Revised (e.g. year changes approved)</b>	April/2021

<b>Programme(s)</b>	<b>Status</b>
This module is linked to the following programme(s)	
PGCert/PGDip/MSc Infectious Diseases (Distance Learning - University of London Worldwide)	Compulsory

## Module Aim and Intended Learning Outcomes

<b>Overall aim of the module</b>
<p>The overall module aim is to:</p> <ul style="list-style-type: none"> <li>provide students with a solid introduction to epidemiology and statistics upon which further Infectious Diseases modules will build.</li> </ul>

<b>Module Intended Learning Outcomes</b>
<p>Upon successful completion of the module a student will be able to:</p> <ol style="list-style-type: none"> <li>Use and interpret different types of data in medical research.</li> <li>Choose and perform the appropriate statistical technique for the analysis of data given the research question.</li> <li>Apply knowledge of sampling to test hypotheses about populations.</li> <li>Interpret the results of a simple statistical analysis and communicate them in a clear, concise and appropriate manner.</li> <li>Discuss the principles of epidemiology and relate these to the decision-making processes involved in the planning, design and analysis of epidemiological research studies and the interpretation of results.</li> </ol>

## Indicative Syllabus

### Session Content

The module will cover the following topics:

- **Section 1: An Introduction to Biostatistics.** This section includes sessions addressing the following topics: introduction to statistical methods for health, describing data, some tools for displaying and analysing quantitative data, regression and correlation analysis, sample size calculations, and statistical computing with STATA.
- **Section 2: An Introduction to Epidemiology.** This section contains sessions covering the basic concepts of epidemiology, epidemiological measures of frequency of diseases, association of impacts, research design and interpretation, surveillance, outbreak investigation, validity and reliability of screening and diagnostic tests, ethics in epidemiology and the critical appraisal of research reports.

## Teaching and Learning

### Notional Learning Hours

Type of Learning Time	Number of Hours	Expressed as Percentage (%)
Directed self-study	100	67
Self-directed learning	15	10
Assessment, review and revision	35	23
<b>Total</b>	<b>150</b>	<b>100</b>

### Teaching and Learning Strategy

Optional formative assignments are available to help students practice some of the principles discussed and obtain tutor feedback. Assignments for this module can be submitted only once annually, no later than 31st March, and must be submitted via the online Assignment Management System.

## Assessment

### Assessment Strategy

Formal assessment of this module is an on-line, take-home, open book exam (100%).

## Summative assessment

Assessment Type	Assessment Length	Weighting (%)	Intended Module Learning Outcomes Tested
On-line, take-home, open book Exam	Download and resubmit within 48 hours. Suggested timing 2 hour 15 minutes.	100	1 – 5

Unseen written examinations for DL modules are held once a year, in June (including resits).

Exams will be held in accordance with annual UoL guidance. They will be conducted in the same format for all students either online or in international exam centres.

There are over 650 examination centres worldwide. They are arranged mainly through Ministries of Education or the British Council. A list of examination centres can be found at <https://london.ac.uk/current-students/examinations/examination-centres>

A local fee will be payable direct to the examination centre. This fee is in addition to the programme/module fee and is set by, and paid directly to, the individual examination centres. The level of local examination centre fees varies across the world and neither the University of London nor the LSHTM have any control over the fee amount.

### Resitting assessment

Resits will accord with the LSHTM's [Resits Policy](#).

The Resit assessment will be the same assessment type as the first attempt (see previous table).

## Resources

### Indicative reading list

- Kirkwood, B., & Sterne, J., (2003). *Essential Medical Statistics*. 2<sup>nd</sup> Ed. Wiley-Blackwell. ISBN: 0865428719.
- Celentano, D.D., & Szklo, M., (2019) *Gordis Epidemiology*. 6<sup>th</sup> Ed. Elsevier. ISBN 9780323552295

Textbooks will be made available in e-format or hard copy to registered students in early autumn.

### Other resources

**Study Guide:** Available online, and to download, via the virtual learning environment

**Reader:** Online reading list available via the virtual learning environment

**Software:** STATA

In addition to the materials above, students are given access to the **LSHTM Virtual Learning Environment (Moodle)** where they can access the study guide, reading list, web-based discussion forums, formative assignments, supplementary materials and the **LSHTM online library resources**.

## Teaching for Disabilities and Learning Differences

The module-specific site on Moodle provides students with access to the module learning materials, including a study guide (with accessible printable versions of sessions) and online reading list (containing essential readings, and textbooks if available) and additional resources, including supplementary exercises and optional lecture recordings (via Panopto). All materials posted in Moodle areas, including computer-based sessions, have been made accessible where possible. The LSHTM Moodle has been made accessible to the widest possible audience, using a virtual learning environment that allows for up to 300% zoom, permits navigation via keyboard and use of speech recognition software, and that allows listening through a screen reader. All students have access to "[SensusAccess](#)" software, which allows conversion of files into alternative formats.

If you have specific access requirements, please contact the Inclusive Practice Manager via [special.arrangements@london.ac.uk](mailto:special.arrangements@london.ac.uk) to request an alternative format of the study guide and for special exam arrangements.
