

MODULE SPECIFICATION

Academic Year (student			
cohort covered by	2021-22		
2	2021-22		
specification)	1501		
Module Code	1501		
Module Title	Economic Evaluation		
Module Organiser(s)	Alec Miners and Zia Sadique		
Faculty	Public Health & Policy		
FHEQ Level	Level 7		
Credit Value	CATS: 15		
	ECTS: 7.5		
HECoS Code	100450 : 100648 : 100402		
Term of Delivery	Term 2		
Mode of Delivery	For 2021-22 it is currently anticipated that will be delivered		
	through a combination of online (pre-recorded lectures) and		
	face-to-face teaching (seminars).		
Mode of Study	Full-time		
Language of Study	English		
Pre-Requisites	Students are required to have taken the Introduction to Health		
•	Economics module or are required to demonstrate equivalent		
	previous training in health economics.		
Accreditation by	None		
Professional Statutory and			
Regulatory Body			
Module Cap (Indicative	90-100		
number of students)			
Target Audience	This module is intended as an alternative or complement to		
	Economic Analysis for Health Policy, and is a requirement for the		
	Health Economics stream of the MSc Public Health. It is also		
	open to those who have followed the Introduction to Health		
	Economics module (1103) in Term 1 or the equivalent LSE		
	module in Health Economics (HP420), and who are able to		
	participate fully in all seminars as well as the assignment.		
Module Description	The module provides students with an understanding of current		
	methods in economic evaluation and how to apply these in		
	carrying out a simple economic evaluation.		
Duration	5 weeks at 2.5 days per week		
Timetabling slot	C1		

Last Revised (e.g. year	October/2021
changes approved)	

Programme(s)	Status	
This module is linked to the following programme(s)		
MSc Public Health (Health Economics)	Compulsory	
MSc Health Policy, Planning & Finance	Recommended	
MSc Public Health	Recommended	
MSc Public Health (Environment & Health)	Recommended	
MSc Public Health (Health Services Research)	Recommended	
MSc Public Health for Development	Recommended	

Module Aim and Intended Learning Outcomes

Overall aim of the module

The overall module aim is to:

• enable students to understand and apply current methods in the economic evaluation of health intervention.

Module Intended Learning Outcomes

Upon successful completion of the module a student will be able to:

- 1. Identify the key features of different types of economic evaluation and explain when each type of evaluation is most appropriately used;
- 2. Assess the relevance and value of economic evaluation for health policy and planning;
- 3. Carry out a simple economic evaluation designed to guide the investment decisions of planners and to help develop health policies.

Indicative Syllabus

Session Content The module is expected to cover the following topics: • Introduction to the principles of health economic evaluation

- An overview of decision modelling for economic evaluation, including Markov models and decision trees, and estimating parameters for cost-effectiveness models
- Approaches for measuring and valuing health outcomes, and costs
- Presenting cost-effectiveness results and handling uncertainty, including probabilistic sensitivity analyses
- Critical appraisal of the value of economic evaluation in health care decision-making

Teaching and Learning

Notional Learning Hours

Type of Learning Time	Number of Hours	Expressed as Percentage (%)
Contact time	33	22%
Directed self-study	50	33%
Self-directed learning	27	18%
Assessment, review and revision	40	27%
Total	150	100%

Student contact time refers to the tutor-mediated time allocated to teaching, provision of guidance and feedback to students. This time includes activities that take place in face-to-face contexts such as lectures, seminars, demonstrations, tutorials, supervised laboratory workshops, practical classes, project supervision as well as where tutors are available for one-to-one discussions and interaction by email. Student contact time also includes tutor-mediated activities that take place in online environments, which may be synchronous (using real-time digital tools such as Zoom or Blackboard Collaborate Ultra) or asynchronous (using digital tools such as tutor-moderated discussion forums or blogs often delivered through the School's virtual learning environment, Moodle).

The division of notional learning hours listed above is indicative and is designed to inform students as to the relative split between interactive (online or on-campus) and self-directed study.

Teaching and Learning Strategy

The module will consist of eleven lectures, and nine seminars/workshops that will either involve the presentation and discussion of an issue or a practical exercise. The seminars will also be used to work through particular aspects of the assignment. Students prepare for this by private study and by meeting in their study group.

Assessment

Assessment Strategy

The assessment for this module has been designed to measure student learning against the module intended learning outcomes (ILOs) as listed above. Formative assessment methods may be used to measure students' progress. The grade for summative assessment(s) only will go towards the overall award GPA.

The assessment for this module will be online.

Assessment Strategy

During the module, a cost-effectiveness analysis will be designed and carried out in small groups. All assessments, however, should be written up individually. During the module each group of students will meet with their seminar leader to discuss progress on the assignment, which is the sole means of assessment for this module.

Summative Assessment

Assessment Type	Assessment Length (i.e.	Weighting	Intended Module
	Word Count, Length of	(%)	Learning Outcomes
	presentation in minutes)		Tested
Coursework	2,500 words	100%	1, 2 and 3

Resitting assessment

Resits will accord with the LSHTM's Resits Policy

Students will be required to revise and resubmit a modified version of the original assignment.

Teaching for Disabilities and Learning Differences

The module-specific site on Moodle gives students access to lecture notes and copies of the slides used during the lecture. Where appropriate, lectures are recorded and made available on Moodle. All materials posted on Moodle, including computer-based sessions, have been made accessible where possible.

LSHTM Moodle is accessible to the widest possible audience, regardless of specific needs or disabilities. More detail can be found in the <u>Moodle Accessibility Statement</u> which can also be found within the footer of the Moodle pages. All students have access to "SensusAccess" software which allows conversion of files into alternative formats.

Student Support Services can arrange learning or assessment adjustments for students where needed. Details and how to request support can be found on the <u>LSHTM Disability Support</u> pages.
