| Module Description                                  | This course is for those who would like to learn about  |                    |  |
|   | working in public health progr  | ammes in low- and  |  |
|   | middle-income   |                    |  |
|   | countries. Lectures cover some planning   |                    |  |
|   | but the emphasis is on the dev  |                    |  |
|   | skills that you will need to do s   |                    |  |
|   | world. As in the real world, students will work in  |                    |  |
|   | groups to evaluate the available evidence-based   |                    |  |
|   | options and design a programme for a specific public  |                    |  |
|   | health problem in a specific se   |                    |  |
|   | provided some background in   |                    |  |
|   | problem and the situation, but  |                    |  |
|   | be found from academic and c  |                    |  |
|   | Information and guidance on how to work well as a   |                    |  |
|   | group will also be provided. A  |                    |  |
|   | available to answer your quest  | -                  |  |
|   | feedback. Towards the end of  |                    |  |
|   | facilitator will review your draft proposal and provide   |                    |  |
|   | constructive comments. Finally, each group will make  |                    |  |
|   | a brief presentation on their proposal (not assessed)<br>and submit a joint final proposal document for |                    |  |
|   | assessment.   |                    |  |
| Duration  | 5 weeks at 2.5 days per week  |                    |  |
| Timetabling slot                                    | Slot C1   |                    |  |
| Last Revised (e.g. year                             | July 2023   |                    |  |
| changes approved)                                   |   |                    |  |
| Programme(s)  |   | Status             |  |
| This module is linked to the following programme(s) |   |                    |  |
| MSc Control of Infectious Diseases                  |   | Recommended Option |  |
| MSc Public Health (Environment & Health)            |   | Recommended Option |  |
| MSc Public Health for Development                   |   | Recommended Option |  |

## Module Aim and Intended Learning Outcomes

### Overall aim of the module

The overall module aim is to:

• work in groups to design a public health programme for a specific low- or middle- income country. Participants will use principles and approaches from lectures in the study module, and draw on their own experience to carry out a task which reflects real-life program design constraints.

### **Module Intended Learning Outcomes**

Upon successful completion of the module a student will be able to:

- 1. Follow a systematic process to define and solve a practical public health problem in a given setting;
- 2. Summarize and evaluate appropriate epidemiological information for the purpose of sotting priorities and selecting appropriate interventions:

setting priorities and selecting appropriate interventions;

### **Module Intended Learning Outcomes**

- 3. Carry out a critical appraisal of different intervention options and select appropriate interventions;
- 4. Formulate appropriate programmatic aims and objectives;
- 5. Describe how to organize a public health programme with respect to human resources, logistics, capacity building, sustainability, and strengthening local structures and imbedding the programme in national systems;
- 6. Describe how to build an effective monitoring and evaluation system into a public health programme;
- 7. Demonstrate skills related to the costing and budgeting of programme activities;
- 8. Develop critical reflections on the ways of working in LMICs and the role of development assistance and aid funding.

# **Indicative Syllabus**

### Session Content

The module is expected to cover the following topics:

- A Global Overview of Public Health Programs;
- Public Health Problem Diagnosis;
- Using Evidence in the Real World;
- Behaviour Change and Advocacy;
- Monitoring and Evaluation;
- Costing and Budgeting;
- Capacity Building & Sustainability;
- Two Technical Forums: Experiences from Organisations Working in LMICs & The Role of Aid Funding and Public Health Programmes
- Group work and collaboration exercises.

## **Teaching and Learning**

### **Notional Learning Hours**

| Type of Learning Time           | Number of Hours | Expressed as<br>Percentage (%) |
|---------------------------------|-----------------|--------------------------------|
| Contact time                    | 2               | 17                             |
| Directed self-study             | 53              | 33                             |
| Self-directed learning          | 30              | 20                             |
| Assessment, review and revision | 45              | 30                             |
| Total                           | 150             | 100                            |

Student contact time refers to the tutor-mediated time allocated to teaching, provision of guidance and feedback to students. This time includes activities that take place in face-to-face contexts such as lectures, seminars, demonstrations, tutorials, supervised laboratory workshops, practical classes, project supervision as well as where tutors are available for one-to-one discussions and interaction by email.

The division of notional learning hours listed above is indicative and is designed to inform students as to the relative split between interactive and self-directed study.

### Teaching and Learning Strategy

Participants learn through problem solving in groups, drawing on the resources, sharing their own experiences and learning from experts with lots of real-world experience. To the extent possible, the disease and setting preferences of participants are considered in choosing the groups.

Lectures are kept to a minimum (10 hours). Lectures cover some practical aspects of programme planning but the emphasis is on the development of practical skills through seminars (6 hours) and group work (128 hours with support from facilitators). There will also be two forums also held this year to give students real world examples of public health programme design (3 hours). Un-examined presentations to a panel will be scheduled for the last weeks of the course in order for students to showcase their work (3 hours).

Facilitators are provided for expert consultation when requested by the groups but they are usually not expected to spend more than one to two hours per group per week. Therefore, most of the organisation, management, and approach of each group are determined by its participants.

### Assessment

#### **Assessment Strategy**

The assessment for this module has been designed to measure student learning against the module intended learning outcomes (ILOs) as listed above. Formative assessment methods may be used to measure students' progress. The grade for summative assessment(s) only will go towards the overall award GPA.

The assessment for this module will be

online. Participants are assessed on:

- (i) Their group's final document (60%)
- (ii) Assessment by peers (20%)
- (iii) An individual MCQ exam (20%)

The written group report will have a maximum length of 20 pages with 10 pages for annexes.

#### **Summative Assessment**

| Assessment Type | Assessment Length<br>(i.e. Word Count,<br>Length of<br>presentation in<br>minutes) | Weighting<br>(%) | Intended<br>Module<br>Learning<br>Outcomes<br>Tested |
|-----------------|--|------------------|--|
| Group Work      | Maximum length of 20 pages   | 60               | 1-8  |
| Peer Assessment | n/a  | 20               | 1-8  |
| Individual exam | 1 hour MCQ exam  | 20               | 1-8  |

#### **Resitting assessment**

Resits will accord with the LSHTM's Resits Policy

For individual students resitting a group assessment there will be an approved alternative assessment as detailed below.

| Assessment being replaced         | Approved Alternative<br>Assessment Type                                | Approved Alternative<br>Assessment Length (i.e.<br>Word Count, Length of<br>presentation in minutes) |
|-----------------------------------|--|--|
| Group work and Peer<br>assessment | The task is to critique the design of a public health project proposal | Maximum length is 2500<br>words  |

#### Resources

#### Indicative reading list

There is a set of specialised course notes, developed for this course, which students will work their way through in conjunction with the lectures (one chapter at a time). This resource will be on Module along with other resources, videos, example documents and recordings of lectures.

# **Teaching for Disabilities and Learning Differences**

The module-specific site on Moodle gives students access to lecture notes and copies of the slides used during the lecture. Where appropriate, lectures are recorded and made available on Moodle. All materials posted on Moodle, including computer-based sessions, have been made accessible where possible. LSHTM Moodle is accessible to the widest possible audience, regardless of specific needs or disabilities. More detail can be found in the <u>Moodle Accessibility</u> <u>Statement</u> which can also be found within the footer of the Moodle pages. All students have access to "SensusAccess" software which allows conversion of files into alternative formats.

Student Support Services can arrange learning or assessment adjustments for students where needed. Details and how to request support can be found on the <u>LSHTM Disability Support pages</u>.
