

LONDON
SCHOOL of
HYGIENE
& TROPICAL
MEDICINE

Graduation Ceremony 2026

Wednesday 25 March 2026

Welcome

Professor Liam Smeeth
MBChB, FRCGP, FFPH, FRCP, MSc, PhD, FMedSci
Director

I am delighted to welcome you to our Graduation Ceremony to celebrate all your fantastic academic achievements during your time studying at the London School of Hygiene & Tropical Medicine (LSHTM).

As alumni of LSHTM, you have exciting and challenging careers ahead creating impact and working to improve health and health equity around the world. I look forward to following your progress in the years to come and I hope that you feel empowered in your endeavours with the knowledge and skills you have gained from your LSHTM experience.

LSHTM is truly a special place that has been enriched by the intellectual and social contribution of current and past cohorts of Master's and Doctoral Degree students. I know that for so many people cost of living pressures are high, making this a difficult time for people to invest in their education. Thank you for trusting us: I hope you can feel proud of your time at our School and have found it academically fulfilling and personally rewarding.

I am also delighted that so many family and friends are also able to join us today. I am sure their support and encouragement have been vital. It is only by supporting each other and working together that we can hope to achieve our vision for a more healthy, sustainable and equitable world for everyone.

You are now part of a truly global network of health professionals, researchers and practitioners working across more than 180 countries worldwide. It is by embracing differences in people, experiences, cultures, and disciplines, united by our shared vision and our values, that makes our School so special.

Huge and heartfelt congratulations to all graduates. I wish you every success for your future and I hope that you will continue to be engaged and proud to be a part of the LSHTM community in the years ahead.

Professor Ahmed Rashid
MBChB, PGCE, MSc, MD, FRCGP, FRCP, PFHEA
Pro-Director Education

It is with great pleasure that I welcome you to the 2026 LSHTM Graduation Ceremony. Today marks a significant milestone in the professional and personal journeys of our graduates, and it is a moment to reflect on the dedication, hard work, and perseverance that have brought them to this point. As we gather to celebrate their achievements, we also look forward to the bright futures that await them.

Studying at LSHTM is not just about acquiring knowledge, and we recognise that learners each have their own personal journeys. Undoubtedly, many challenging moments will have been overcome by each of our graduates, and these triumphs contribute to the success we celebrate today.

I also take this opportunity to recognise the many invaluable contributions our graduates have made to LSHTM throughout their time here. They have enriched this community in unique and meaningful ways through their academic achievements, their involvement in student activities, and the personal connections they've fostered with peers and faculty. Their ideas and perspectives have helped shape the vibrant and dynamic environment that defines LSHTM.

Today, our graduates join a special community of alumni and are part of an incredible network of health practitioners, researchers, and leaders working to improve health across the world. This network offers opportunities to stay connected with fellow graduates and to contribute to the mission of LSHTM in different ways.

Warmest congratulations to all our new graduates – we are incredibly proud of you and wish you the very best for your future endeavours.

Platform Party – Core and Executive

Guest Speaker

Izukanji Sikazwe

Izukanji Sikazwe is a Zambian infectious disease physician, HIV programme implementation expert, and clinical researcher with more than two decades of experience advancing equitable, high-impact HIV programmes in Zambia. She is a graduate of the School of Medicine at the University of Zambia, and completed an Internal Medicine residency at the Good Samaritan Hospital in Baltimore, and an Infectious Disease fellowship at the University of Maryland. She also holds a Master of Public Health from Michigan State University and is an alumna of the Kofi Annan Global Public Health Leadership Program at the Africa Centers for Disease Control and Prevention.

As a principal investigator for multiple USA government-funded HIV prevention, care, and treatment programmes, she led the scale-up of life-saving services across urban and rural Zambia. Her research has contributed to global advances in health and has helped shape international guidelines in HIV differentiated service delivery and person-centered care to enhance client retention in public health systems.

Driven by a deep commitment to health equity and local leadership, Dr Sikazwe has worked closely with Zambia's Ministry of Health and served for several years as Chief Executive Officer of the Centre for Infectious Disease Research in Zambia, the country's largest and most influential public health research and implementation organisation. She has leveraged her lived experiences in clinical care, research, and public health leadership to drive real-world impact.

She joined the Global Fund to Fight AIDS, Tuberculosis and Malaria in July 2025, to continue to advance innovative HIV programming in an evolving public health ecosystem. Dr Sikazwe is a mentor and champion for the next generation of African scientists and public health leaders, driven by a steadfast belief that locally driven solutions can transform global health.

Prizes

The Adrian Root Prize

The Adrian Root Prize is awarded for the best Electronic Health Records project in the MSc Epidemiology course. Adrian was a much-loved colleague in the Electronic Health Records Group who died in 2017. He was a GP who came to LSHTM to study the MSc in Epidemiology and went on to gain an MRC Population Health Scientist Fellowship to pursue a PhD looking at the population impact of drug interactions in primary care. Adrian was a keen advocate of the use of anonymised health records to answer important questions about health, and this prize honours those who will continue his work.

The Bo Drasar Prize

The Bo Drasar Prize is awarded for outstanding performance in MSc Medical Microbiology. Professor Bohumil (Bo) Drasar joined the School in 1976 and was Course Organiser for the MSc in Medical Microbiology from 1976-1996. From 1990 to 1998 he was in charge of the reorganisation of LSHTM's MSc programmes and from 1998 to 2000 he was responsible for the development of our Distance Learning Programme. This prize in his name has been established in recognition of his contribution to teaching at LSHTM with particular reference to his devotion to medical microbiology.

The Chadwick and Daley Prize

The Chadwick and Daley Prize is awarded to the best student of the year in MSc Public Health. The Prize is awarded by the Chadwick Trust UCL. This fund comprises a gift made in 1932 by the Chadwick Trustees, of which the income was available to provide an annual prize of books for the best student in the MSc Social Medicine course. In 2005 LSHTM's Council agreed to resume the Award for the nearest successor to the MSc Social Medicine course, MSc Public Health.

The Chesmal Siriwardhana Prize

The Chesmal Siriwardhana Prize is awarded for outstanding performance in the MSc in Global Mental Health. The award is given in memory of Dr Chesmal Siriwardhana, who was an Associate Professor in the Centre for Global Mental Health, Department of Population Health at LSHTM. His work on armed conflict, migration and mental health put him at the forefront of some of the major public health challenges of the day. His research helped to improve understanding on mental health needs and the effectiveness of mental health services for conflict-affected persons, particularly in Sri Lanka. He also sought to improve research practice, leading a research study on improving ethical research standards in humanitarian crises.

The Climate Change and Planetary Health Project Prize

The Climate Change and Planetary Health Project Prize is awarded to the student who has submitted the best project of the year for examination in MSc Climate Change and Planetary Health. The Prize is funded by the WHO Collaborating Centre on Climate Change, Health and Sustainable Development.

The Daniel Batty Memorial Prize

This prize is named in memory of Daniel Batty, a former MSc Epidemiology student. Daniel sadly passed away in 2025 and was unable to complete the course. The prize is set up by Daniel's family, in memory of their son, for the highest-scoring student on MSc Epidemiology.

Dr Aashrai Gudlavalleti Memorial Prize

This prize is named in memory of Dr Aashrai Gudlavalleti, a former MSc Epidemiology by Distance Learning student. Dr Aashrai Gudlavalleti was enrolled in the programme in 2022 and later awarded the PG Cert posthumously, following his passing in 2024, in acknowledgment of his consistently high grades and hard work. The prize is set up by Dr Gudlavalleti's family, in memory of their son, for the highest-scoring student from a low- or middle-income country on the same programme.

The Eldryd Parry Prize

The Eldryd Parry Prize is awarded to the student considered to have the best overall performance in the MSc Control of Infectious Diseases. Eldryd Parry worked in Ghana, Ethiopia and Nigeria, as Professor and Dean of Medicine. He was the Chair of the Tropical Health Education Trust. This Prize is named in recognition of his extraordinary achievements and his dedication to Medicine and Health Education in Africa.

The Frederick Murgatroyd Award

The Frederick Murgatroyd Award is given to the best student of the year in MSc Tropical Medicine & International Health. The Award was donated by Mrs Murgatroyd in memory of her husband, who held the Wellcome Chair of Clinical Tropical Medicine in 1950 and 1951.

The Garnham Prize

Professor Cyril Garnham (1901-1994) was one of the UK's leading parasitologists in the 20th Century and his work was characterised by outstanding achievement as both laboratory scientist and field worker in the tropics. The prize is awarded annually to an outstanding research student completing a doctoral thesis preferably in the area of basic science.

The Gordon Johnson Prize

The Gordon John Prize is awarded for outstanding performance in the MSc course in Public Health for Eye Care. The Prize is given in honour of Professor Gordon Johnson who established the MSc in Community Eye Health.

The Health Data Science Prize

The Health Data Science Prize is awarded for outstanding performance in MSc Health Data Science.

The Hecht Bequest Prize

The Hecht Bequest is awarded to the best student on the MSc Nutrition for Global Health course (formerly MSc Public Health Nutrition). This fund comprises a bequest by Mr C E Hecht, who died in 1942, of which the income was available to provide a Prize of books for the best student of the year in Diploma in Nutrition. In 2005 LSHTM's Council agreed to resume the Award for the nearest successor to the Diploma in Nutrition course, MSc Public Health Nutrition.

The Hooper Prize

The Hooper Prize is awarded annually to the student considered to have submitted the best project on the MSc Public Health for Eye Care course.

The James Busvine Memorial Prize

The James Busvine Memorial Prize is awarded for outstanding performance in MSc Medical Parasitology (formerly was awarded for the MSc Medical Entomology for Disease Control). The award is given in memory of Professor James Ronald Busvine, Emeritus Professor of Entomology and twice Chairman of the World Health Organization Expert Committee on Insecticides. After working as an Entomologist to the Ministry of Health, James Busvine joined the Entomology department of LSHTM as a Lecturer. James worked with Professor Patrick Buxton on new measures to control human lice. His main practical contribution was the development of field tests for the detection and measurement of resistance in insecticides.

The Jerry Morris Prize

The Jerry Morris Prize is awarded annually to an outstanding research student completing a doctoral thesis relevant to health policy, systems and services, or to individual, social, and environmental influences on health. The award is given in memory of Professor Jerry Morris, Emeritus Professor of Public Health and Honorary Fellow. Jerry Morris was a towering figure in post-war public health who died in 2009, aged 99. Jerry's work on the link between heart disease and exercise, his involvement with post-war health commissions and his seminal work, Uses of Epidemiology, all helped form this pioneering and inspirational man.

The John Henry Memorial Prize

The John Henry Memorial Prize is awarded for an outstanding research project that ideally has potential impact on control of infectious disease in Africa. This prize was set up in memory of a former accepted student on the MSc Control of Infectious Diseases who died tragically before taking up his place.

The John Rivers Prize

The John Rivers Prize is awarded to the student who has shown the most promise during the year in MSc Nutrition for Global Health course (formerly MSc Public Health Nutrition). The Prize is founded in memory of John Rivers, for his outstanding contribution and research in Human Nutrition.

The LSHTM Prize for Research Advancing Statistical Methodology

The LSHTM Prize for Research Advancing Statistical Methodology is awarded annually in recognition of an outstanding doctoral thesis that makes a substantial contribution to the advancement of statistical methodology and demonstrates clear potential for impact on health-related research.

The LSHTM Prize for Research Advancing the Health of Vulnerable Populations

The LSHTM Prize for Research Advancing the Health of Vulnerable Populations is awarded annually in recognition of an outstanding doctoral thesis that advances understanding of health challenges faced by socially, economically, or politically marginalised groups, and makes a significant contribution to improving the health and wellbeing of marginalised or underserved communities, with clear relevance for policy, practice, or social change.

The Martin Taylor Prize

The Martin Taylor Prize is awarded to a candidate for attaining “outstanding performance” during the course of study of MSc Infectious Diseases by distance learning.

The Michael Steward Prize

The Michael Steward Prize is awarded for outstanding performance in MSc Immunology of Infectious Diseases.

The Nand Lal Bajaj and Savitri Devi Prize

The Nand Lal Bajaj and Savitri Devi Prize is awarded for the best project of the year submitted for the examination in MSc Epidemiology. The Prize was donated by Dr Subhash Chandra Arya, Dip. Bact, PhD, in honour of his parents, Dr Nand Lal Bajaj and Mrs Savitri Devi.

The Norman Noah Prize

The Norman Noah Prize is awarded for the best epidemiology project across face-to-face and Distance Learning MSc Epidemiology.

The Patrick Buxton Memorial Prize

The Patrick Buxton Memorial Prize is awarded for outstanding performance in MSc Medical Parasitology. The Prize was founded by relatives of Patrick Alfred Buxton, Professor in Entomology, who died in 1955.

The PSI Andrew Hewitt Prize

The PSI Andrew Hewitt Prize is awarded to the best student on the course in MSc Medical Statistics. The Prize was founded in memory of Andrew Hewitt, an alumnus of LSHTM and is awarded by the PSI (Statisticians in the Pharmaceutical Industry).

The Reproductive and Sexual Health Research Prize

The Reproductive and Sexual Health Research Prize is awarded to the student who has submitted the best project of the year for examination in MSc Reproductive and Sexual Health Research. The Prize is awarded by the Centre for Population Studies.

The Selwyn-Clarke Prize

The Selwyn-Clarke Prize is awarded for the best project of year submitted for the examination in MSc Demography & Health. The Prize has been donated by Sir Selwyn-Clarke in memory of the help given to him by Sir Andrew Balfour, Sir William Johnson and the staff of LSHTM.

The Tsiquaye Prize

The Tsiquaye Prize is awarded annually to the student who has submitted the best virology project of the year for examination in MSc Medical Microbiology. Dr Kwesi Tsiquaye joined LSHTM in 1962 and was Course Organiser for the MSc in Virology from 1995 until his retirement from the position of Senior Lecturer in Virology in 2004. This Prize in his name has been established in recognition of his contribution and dedication to postgraduate teaching in virology at LSHTM.

The William Simpson and Okeke Prize

The William Simpson and Okeke Prize is awarded to the best student on the MSc Public Health for Development (formerly MSc Public Health in Developing Countries) course. This Prize combines a gift from Dr E D Okeke, a former DrPH student from Nigeria in 1964, with money raised in 1937 to the memory of Sir William Ritchie Simpson, visiting lecturer in hygiene at LSHTM 1898-1923 and Director of Tropical Hygiene at the Ross Institute from 1924 until his death in 1931.

The Woodruff Prize

The Woodruff Prize is awarded each year to an outstanding research student completing a doctoral thesis with preference being given to clinical studies of patients and whose work is likely to lead to the alleviation of suffering in tropical or developing countries. The Prize is presented in memory of Professor Alan Woodruff (1916-1992) who held the Wellcome Chair of Clinical Tropical Medicine at LSHTM for many years up to 1981.

The Zoe Walker Memorial Prize

The Zoe Walker Memorial Prize is awarded to the student who has demonstrated the greatest understanding of the principles of health promotion, and who has an expected commitment to health promotion practice or research within the MSc Public Health (Health Promotion Sciences). This Prize is awarded in celebration of the work and life of Dr Zoe Walker who was an MSc student in Health Promotion at LSHTM and subsequently carried out valuable research into health promotion for adolescents.

University of London Academic Achievement Prize

The University of London Academic Achievement Prizes are awarded to students with the highest overall GPA on Distance Learning programmes.

A message from the President of the Student Representative Council

Congratulations to the Class of 2025.

What a remarkable journey this has been. We arrived from different corners of the globe, united by a shared commitment to improving health, challenging inequities, and building a fairer world. London and LSHTM became more than a place of study. They became a meeting point of our cultures, ideas, and friendships that will stay with us long after graduation.

I am grateful for the community we created together. A space shaped by late nights working on theses, seminar groups that turned into friendships, and spontaneous moments on the steps outside the school, whether for a quick photo, a conversation, or a well needed pause. We truly made the most of moments together.

To our families and friends, thank you for your unwavering support, encouragement, and belief in us. This achievement belongs to you too.

Thank you for trusting me to serve as your SRC President. It has been an honour to lead such an inspiring cohort. We shared laughter, challenges, and moments of joy. Together, we built something meaningful, and I hope the spirit we nurtured continues as the next cohort carries the baton forward.

Today, we come together to celebrate a year marked by sacrifice, perseverance, community, and achievement. As we step into whatever comes next, I have no doubt you will be brilliant. Take up space. Challenge systems. Be bold in your compassion and fearless in your vision.

Despite the challenges facing our world, let us choose to be catalysts for hope, justice, and better health for all.

I hope our paths cross again in the near future. Until then, keep well, take care of yourselves, and carry this community with you wherever you go.

Well done, Class of 2025. The world is better because you are in it.

Dr Lethukwenama Letsoalo
*MBChB, PGDIPPH, MScPH**

Congratulations

Congratulations on graduating from LSHTM and joining our global community of alumni in more than 180 countries worldwide.

Despite being spread across the globe, our alumni stay close to LSHTM and support each other.

You can network with alumni, staff, and students on our portal, [LSHTM Connect](#). Here you can search for friends or alumni in your area, initiate discussions, search and add job opportunities, become or find a mentor, register for events, and keep in touch with the latest news from LSHTM centres and interest groups.

We have dozens of [international chapters around the world](#) bringing local LSHTM communities together to socialise and network. Visit the alumni pages of the LSHTM website to see if there's a chapter in your area, and if not, why not start one? That way, you'll never be too far from your LSHTM family!

We often hold [alumni events](#) to bring together old friends and make new connections. Details can be found online and in our monthly e-newsletters, which you will now receive as a new graduate, so please confirm your contact details via LSHTM Connect or by email – or come and visit the Alumni team stand at today's ceremony and pick up your welcome gift!

Here are just some of the many ways that you can stay connected to the LSHTM community:

- Find a mentor, or become a mentor to current students
- Promote the School as an [Alumni Ambassador](#)

- Host or attend an alumni event
- Write for our [alumni blog](#) or appear in a vlog
- Raise funds, get fit and make friends through our exciting [community challenge events](#)
- Donate to support future generations of students or advance our pioneering research
- Tell your friends and contacts about studying at LSHTM
- Advance your professional skills and benefit from an [exclusive alumni discount](#) on one of our short courses
- Follow and contribute to our social media channels

So do keep in touch and make the most of the benefits and opportunities available to you, including free access to the [Careers Service](#) for the next two years. We love hearing about where life has taken you since graduating. We regularly feature alumni stories in our communications as we know just how inspiring it is for current and future students to see what career possibilities lie ahead.

We are so proud of you and wish you all the very best for the future – please keep in touch and you are always welcome to come back to see us!

The LSHTM Scholarship Fund

Celebrating your graduation by helping others to succeed is a powerful way to improve health equity worldwide.

We know that finance is a significant barrier to education, which is why we raise funds for scholarships for promising students, who otherwise would not be able to study at LSHTM. Thanks to the generous contributions from our alumni, friends, their families, philanthropists, and partner organisations, we are able to welcome students from around the world, regardless of their background.

Global health threats such as infectious diseases, climate change, and chronic conditions continue to increase. LSHTM alumni are at the forefront of tackling these challenges through research, expertise and health policy.

As our newest graduates, we hope you will treasure today's celebration, your time here and the life-long friends that you have made. We also encourage you to consider marking this special occasion by supporting the next generation of global health leaders – either by making a gift to the **LSHTM Scholarship Fund** or taking on one of our **community fundraising challenges**.

To learn more about supporting scholarships and other initiatives at LSHTM, please visit: www.lshtm.ac.uk/supportus/lshtm-fund or get in touch at development@lshtm.ac.uk

“

“Your generosity empowers committed professionals like me to drive lasting improvements in health and well-being for the communities we serve.”
