

Help Shape a Healthier, Warmer and Greener Future for London Housing

Share your lived experience and take part in a focus group!

Many homes in the UK are cold, damp and mouldy, and this can make people ill — especially older people, children, and anyone with breathing problems. [We are studying the impacts on health](#) and want to learn more about the issues that matter most to people. **Participants will be given a shopping voucher (£55) as a thank-you.**

You can join the focus group if:

1. You **rent privately** or **own your home**, and
2. You **receive one of the following benefits**: Universal Credit, Pension Guarantee Credit, Pension Savings Credit, Income Support, income-based JSA, income-related ESA, Child Benefit, or Housing Benefit, and
3. Your home has an **energy efficiency rating of E, F or G**:

www.gov.uk/find-energy-certificate
