How to reduce TB transmission in health clinics and public spaces

Low-risk

- Queuing outside at distance and with masks

Low-medium-risk

- Waiting indoors in a non-crowded, well-ventilated room with masks

Medium-risk

- Waiting indoors in a non-crowded, well-ventilated room without masks
- Arriving early when it is busy

High-risk

- Waiting indoors in a crowded, poorly-ventilated room without masks
- Close contact without masks

This work is supported by Antimicrobial Resistance Cross Council Initiative supported by the seven research councils in partnership with other funders’ as the funding source (www.mrc.ac.uk/amr).
