

LONDON
SCHOOL of
HYGIENE
& TROPICAL
MEDICINE

Graduation Ceremony 2024

Friday 8 March 2024

Welcome

Professor Liam Smeeth
MBChB, FRCGP, FFPH, FRCP, MSc, PhD, FMedSci
Director

I am delighted to welcome you to our Graduation Ceremony to celebrate all your fantastic academic achievements during your time studying at the London School of Hygiene & Tropical Medicine (LSHTM).

As alumni of LSHTM, you have exciting and challenging careers ahead creating impact and working to improve health and health equity around the world. I look forward to following your progress in the years to come and I hope that you feel empowered in your endeavours with the knowledge and skills you have gained from your LSHTM experience.

LSHTM is truly a special place that has been enriched by the intellectual and social contribution of current and past cohorts of Master's and Doctoral Degree students. I know that for so many people cost of living pressures are high, making this a difficult time for people to invest in their education. Thank you for trusting us: I hope you can feel proud of your time at our School and have found it academically fulfilling and personally rewarding.

I am delighted that so many family and friends are also able to join us today – their support and encouragement have been vital. It is only by supporting each other and working together that we can hope to achieve our vision for a more healthy, sustainable and equitable world for everyone.

You are now part of a truly global network of health professionals, researchers and practitioners working across more than 180 countries worldwide. It is by embracing differences in people, experiences, cultures, and disciplines, united by our shared vision and our values, that makes our School so special.

Huge and heartfelt congratulations to all graduates. I wish you every success for your future and I hope that you will continue to be engaged and proud to be a part of the LSHTM community in the years ahead.

Craig Higgins
BSc, MSc
Pro-Director Education

I am delighted, as our School's Pro-Director Education, to celebrate with you your great achievements.

Very well done to the Graduates of our Master's and Doctoral Degree Programmes.

Thank you for the contributions that you made to the academic and social life of our School. I do hope that you enjoyed your time with us and forged life-long friendships. Today, you join a special global community - the alumni of the London School of Hygiene & Tropical Medicine. The world needs your knowledge, skills, resourcefulness and passion. As your careers develop, we will be looking to you for support in our shared mission of generating research knowledge, educating future generations of students, and engaging with policymakers, practitioners and communities, in order to improve health and health equity worldwide.

We very much look forward to keeping in touch with you in the years ahead.

Platform Party – Core and Executive

Guest Speaker

Roshni Mooneeram

Director of Equity, Diversity and Inclusion, LSHTM

Roshni has a wealth of EDI leadership and consultancy experience, including in higher education and the life sciences. Prior to joining LSHTM, she was head of the EDI office at the European Molecular Biology Lab, and has also led EDI projects in Africa, Asia and Europe with organisations such as the African Union, the UN, the EU, CERN, the University of Nottingham and the Max Delbrück Centre for Molecular Medicine. Her early career was in academia, first at Birmingham City University, and then at the University of Nottingham in China as an associate professor and the director of an academic department and research centre. She retains an affiliation with the University of Nottingham as honorary associate professor.

Honorary Fellows

The Honorary Fellowships are LSHTM's most prestigious honour. The Fellowships are conferred triennially on those persons who have rendered exceptional service to LSHTM or have attained exceptional distinction in any of the subjects taught at LSHTM. The three outstanding recipients in 2024 are:

John O'Donnell

Former Interim Chair of Council, LSHTM

John O'Donnell is a highly experienced senior business executive, leading large global teams and specialising in delivering improvements. A lawyer by profession, he provided extensive voluntary service to the LSHTM Council for over a decade.

In 2011, he was first appointed to the Council - the governing body of LSHTM with responsibility for its operational and strategic management. In 2019, after serving three terms he was asked to continue for an exceptional fourth term to oversee the recruitment of a new Chair of Council and the new Director of the School.

During his time at LSHTM, Mr O'Donnell served as Deputy Chair of Council, Honorary Treasurer, Chair of Finance & Development and a member of the Nominations Committee, the People Committee, the Remuneration Committee and the Capital Projects Steering Group. This Group oversaw the construction of our new building at Tavistock Place, the development of an Estates Master Plan for the Keppel Street site, and the construction and refurbishment of facilities in the Gambia and Uganda.

In 2018, he took over as Interim Chair of Council for 10 months. He chaired the selection panel to recruit a new Chair of Council. He also set up and was a member of the selection panel for the recruitment of a new Director of the School, Liam Smeeth, to replace Peter Piot who retired as Director in July 2021.

Mr O'Donnell's commercial career has included senior management roles for Reed Elsevier and Accenture. He is currently Executive Chair of Via.Trade (Dints), working with the management team to develop and execute the strategic growth plan, overseeing business process improvement and execution, and coaching to improve performance.

Mr O'Donnell's leadership, and strategic business and legal experience, provided valuable strength and expertise to LSHTM during his time on the Council.

Honorary Fellows

Professor Jane Carlton

Director, Johns Hopkins Malaria Research Institute, Bloomberg School of Public Health

Professor Jane Carlton is a geneticist and leader in her field, using genomics to make important discoveries about malaria parasites and the mosquitoes that transmit them. She is Director of the Johns Hopkins Malaria Research Institute at the Bloomberg School of Public Health in Baltimore in the USA. She has long-standing research links with LSHTM.

Prof Carlton undertook her PhD studies on the genetics of drug resistance in malaria parasites in the lab of David Walliker at the University of Edinburgh, graduating in 1995. After moving to the USA, she was part of the international consortium to generate the first genome sequence of *Plasmodium falciparum*. Prof Carlton subsequently led the projects to generate the reference genomes of *Plasmodium vivax* and *Plasmodium yoelii*.

Her research uses the tools of comparative genomics – studying the organism's complete set of genes and DNA - to understand the biology and evolution of malaria parasites to uncover better methods to diagnose, track and control them. For the past 14 years she has been Director of an International Center of Excellence for Malaria based in India, where she leads teams of scientists and clinicians at several institutes in India, USA, and the UK- including at LSHTM, carrying out research and surveillance on the epidemiology, transmission, genomics, and pathogenesis of malaria. Prof Carlton has overseen work resulting in transfer of novel technologies, infrastructure development, and training students and researchers in India.

More recently Prof Carlton has incorporated integrative genomics (transcriptomics, metabolomics and proteomics) of *P. falciparum* and *P. vivax* clinical isolates from India and Ethiopia in a systems biology approach to study the interaction between the Plasmodium parasite and its human host. She has a keen interest in using 'omics data and machine learning to generate better diagnostic tests and has collaborated with biotechnology companies. She also acted as a Technical Advisor to the World Health Organization's Global Malaria Programme for development of preferred product characteristics of diagnostics for risk of *P. vivax* relapse.

Honorary Fellows

Professor Laura Rodrigues

Emeritus Professor of Infectious Disease Epidemiology, LSHTM

Professor Laura Rodrigues has been a leading figure in infectious disease epidemiology for over 30 years. She has conducted ground-breaking research on a wide range of public health issues including vaccines, links between infection and allergy, tuberculosis, HIV, dengue, leprosy, and Zika.

She has led on a number of large studies including the largest BCG tuberculosis vaccine trial worldwide, seminal studies on the burden and aetiology of infectious intestinal diseases, and investigating the interaction between helminth infection and asthma. She was instrumental in setting up, with Brazilian collaborators, the 100 Million Cohort, a linked database of over 100 million individuals in Brazil, containing information on housing conditions, education, income and health outcomes. It forms an extraordinary international resource for detailed epidemiological studies that is already producing important results and will be hugely beneficial for research for years to come.

Prof Rodrigues also played a key role in the Zika virus disease epidemic in Latin America and was asked to join the Microcephaly Epidemic Research Group (MERG), commissioned in 2015 by the Brazilian Government. With colleagues, she published the first case-control study of Zika infection and microcephaly; an early description of the features of Zika-related microcephaly, and the first complete audiologic evaluation of newborns.

As Dean of the Faculty of Epidemiology and Population Health, she successfully led and managed a faculty of 300 staff, 100 PhD students, and six Master's courses. Under her leadership, LSHTM launched a new Master's, and recruited some outstanding scientists working on health in low- and middle-income countries. This supported the strategic development of modelling research, which had enormous pay-offs when the Ebola and COVID-19 epidemics hit. She led the development of the successful Distance Learning MSc in Epidemiology, in part to increase access to students in low- and middle-income countries.

MPhil/PhD - Infectious and Tropical Diseases

Ada Ejealor Aghaji
Assessing the technical capacity of primary health care facilities in Anambra state, Nigeria to implement the World Health Organisation African Region’s primary eye care package

Dorothy Peters Boggs
Population-based methods to estimate assistive technology needs for functional hearing, vision estimate assistive product need for the domains of vision, hearing and mobility.

Luke John Brandner-Garrod
A platform for genome editing insect vectors of Leishmaniasis (*Lutzomyia longipalpis* and *Phlebotomus papatasi*) and Chagas disease (*Rhodnius prolixus*) via CRISPR-Cas9 based approaches

Rachael Mary Burke
Improving outcomes for adults living with HIV admitted to hospital in the era of high antiretroviral therapy coverage

Egle Butkeviciute
Studies on innate immune responses to *Mycobacterium bovis* BCG

Hay Ching Kallista Chan
Rice and malaria in Africa: seeking vector control in rice cultivation practices

Juan Emmanuel Dewez
The adoption of rapid diagnostic tests for the clinical management of acute childhood infections in European settings

MPhil/PhD - Infectious and Tropical Diseases cont.

- Eve Christina Doran
The role of human pentraxins for the Leishmania-vector interaction
- Rhodri Tomas Mawr Edwards
Development of a gene editing platform for sand fly vectors of Leishmania through CRISPR-Cas9 genetic modification targeting genes associated with olfaction
- Helena Rosemary Anne Feasey
Investigating the potential impact and suitability of tuberculosis active case-finding approaches in the rapidly changing environment of urban Blantyre, Malawi
- Matthew Higgins
Developing a recombinase polymerase amplification (RPA) based molecular barcoding tool for Plasmodium malaria parasites
- Geunhye Hong
Investigation of Campylobacter jejuni modulation of host defence mechanisms in human intestinal epithelial cells
- Penda Tutan Johm
Understanding factors influencing maternal vaccination acceptance in The Gambia
- Christian Kositz
Investigating the effects of Ivermectin plus Dihydroartemisinin-Piperaquine MDA on malaria transmission by measuring serological markers of exposure and its effects on the prevalence of ectoparasites and soil-transmitted helminths
- Aeesha Nusrat Jehan Malik
Integrating primary eye care into child health policies and programmes, using Tanzania as a case study

- Scott Kaba Matafwali
Innovative private pharmacy distribution channels: implications on medicine quality in Zambia
- Henry Ddumba Mawejje
Anopheles species composition and insecticide resistance patterns in Uganda
- Tate Ewart Oulton
Development and validation of serological assays to evaluate malaria transmission
- Stevens Eugene Robertin
Investigating new roles for septins in host-pathogen interactions using staphylococcus aureus
- Rebecca Barbara Roscoe
Characterising kinetoplastid pantothenate kinase, a multifunctional enzyme of the CoA biosynthesis pathway
- Alicia Showering
The role of the skin microbiome and host genetics in human attractiveness to mosquitoes
- Penny Chantal Sparkes The Garnham Prize
Exploring energy metabolism in male and female Plasmodium falciparum gametocytes
- Tanushree Tunstall
Using machine learning to anticipate antimicrobial resistance in mycobacterium tuberculosis
- Tansy Malika Ray Vallintine
Shining a light on dense granules – a biochemical, genetic and cell biological investigation of an essential but understudied compartment of the malaria parasite
- Caroline Elizabeth Whidden
Evaluation of proactive community case management to accelerate access to care and reduce under-five mortality in Mali: a cluster randomised trial and process evaluation

- MPhil/PhD by Publication - Infectious and Tropical Diseases
Shari Nicole Krishnaratne
The influence of context on healthcare worker responses to public health interventions
- MPhil/PhD - Infectious and Tropical Diseases (Nagasaki)
Ashley Alexandra Osborne
A multifaceted investigation of the genomics of malaria, from parasite to host, using next-generation sequencing technologies
- Susan Abarca Salazar (Posthumous) Obituary
Evaluating novel diagnostics to distinguish between children with tuberculous meningitis and other central nervous system infections
- Saho Takaya
Developing a surface cell antigen a-based serological test for scrub typhus diagnosis

- DrPH - Infectious and Tropical Diseases
Daniel Jason McCartney
Clinical epidemiology of sexually transmitted infections among transgender women in Brazil
- Tyronza Sharkey
Impact of couple-based interventions on knowledge uptake, implementation, and communication of strategies to prevent HIV, non-communicable and neglected tropical diseases in Zambian HIV seroconcordant negative couples
- Patricia Waterous
Exploring the psychosocial impact of tuberculosis and gaps in service provision for adolescents and young adults: a qualitative study in Zimbabwe

Medals and Prizes

The Adrian Root Prize

The Adrian Root Prize is awarded for the best Electronic Health Records project in the MSc Epidemiology course.

Adrian was a much-loved colleague in the Electronic Health Records Group who died in 2017. He was a GP who came to LSHTM to study the MSc in Epidemiology and went on to gain an MRC Population Health Scientist Fellowship to pursue a PhD looking at the population impact of drug interactions in primary care. Adrian was a keen advocate of the use of anonymised health records to answer important questions about health, and this prize honours those who will continue his work.

The Amanda Jaclyn Berger Prize

The Amanda Jaclyn Berger Prize is given to an outstanding student in MSc Public Health course for non-communicable disease work, preferably in low- and middle-income countries.

The Prize was donated by her family in memory of Amanda Berger, an MSc Public Health student who died in 2012.

The Bradford-Hill Prize

The Bradford Hill prize is awarded annually to an outstanding research student completing a doctoral thesis on methodological research in epidemiology, biostatistics, or related disciplines.

Sir Austin Bradford Hill (1897–1991) joined LSHTM in 1927. He became Reader in Epidemiology and Vital Statistics in 1933. In 1937 he published the first edition of Principles of Medical Statistics, a textbook which has influenced generations of medical statisticians and epidemiologists. He worked with Sir Richard Doll at LSHTM on the carcinogenic effects of smoking and on the use of randomisation in clinical trials of new drugs.

The Bo Drasar Prize

The Bo Drasar Prize is awarded for outstanding performance in MSc Medical Microbiology.

Professor Bohumil (Bo) Drasar joined the School in 1976 and was Course Organiser for the MSc in Medical Microbiology from 1976–1996. From 1990–1998 he was in charge of the reorganisation of LSHTM's MSc programmes and from 1998 to 2000 he was responsible for the development of our Distance Learning Programme. This prize in his name has been established in recognition of his contribution to teaching at LSHTM with particular reference to his devotion to medical microbiology.

The Cicely Williams Prize

The Cicely Williams prize is awarded annually to an outstanding research student completing a doctoral thesis on research which advances the health of vulnerable populations.

Dame Cicely Williams (1893–1992) was one of the first female medical students at Oxford University, subsequently studying at LSHTM, 1928–1929. On joining the Colonial Service, she was the first woman posted to the Gold Coast (now Ghana), where she identified kwashiorkor, a protein deficiency disease affecting young children. From the late 1940s to the mid-1960s she worked with the World Health Organization. She worked at LSHTM as Senior Lecturer in Nutrition between 1953–1955.

The Chadwick and Daley Prize

The Chadwick and Daley Prize is awarded to the best student of the year in MSc Public Health.

The Prize is awarded by the Chadwick Trust UCL. This fund comprises a gift made in 1932 by the Chadwick Trustees, of which the income was available to provide an annual prize of books for the best student in the MSc Social Medicine course.

In 2005 LSHTM's Council agreed to resume the Award for the nearest successor to the MSc Social Medicine course, MSc Public Health.

The Chesmal Siriwardhana Prize

The Chesmal Siriwardhana Prize is awarded for outstanding performance in the MSc in Global Mental Health.

The award is given in memory of Dr Chesmal Siriwardhana, who was an Associate Professor in the Centre for Global Mental Health, Department of Population Health at LSHTM. His work on armed conflict, migration and mental health put him at the forefront of some of the major public health challenges of the day. His research helped to improve understanding on mental health needs and the effectiveness of mental health services for conflict-affected persons, particularly in Sri Lanka.

He also sought to improve research practice, leading a research study on improving ethical research standards in humanitarian crises.

The Eldryd Parry Prize

The Eldryd Parry Prize is awarded to the student considered to have the best overall performance in the MSc Control of Infectious Diseases.

Eldryd Parry worked in Ghana, Ethiopia and Nigeria, as Professor and Dean of Medicine, and as the Chair of the Tropical Health Education Trust. This Prize was named in memory of his extraordinary achievements and his dedication to Medicine and Health Education in Africa.

The Frederick Murgatroyd Award

The Frederick Murgatroyd Award is given to the best student of the year in MSc Tropical Medicine & International Health.

The Award was donated by Mrs Murgatroyd in memory of her husband, who held the Wellcome Chair of Clinical Tropical Medicine in 1950 and 1951.

The Garnham Prize

The Garnham Prize is awarded annually to an outstanding research student completing a doctoral thesis preferably in the area of basic science. Professor Cyril Garnham (1901 – 1994) was one of the UK's leading parasitologists in the 20th century and his work was characterised by outstanding achievement as both laboratory scientist and field worker in the tropics.

The Gordon Johnson Prize

The Gordon John Prize is awarded for outstanding performance in the MSc course in Public Health for Eye Care.

The Prize is given in honour of Professor Gordon Johnson who established the MSc in Community Eye Health.

The Hecht Bequest

The Hecht Bequest is awarded to the best student on the MSc Nutrition for Global Health course (formerly MSc Public Health Nutrition).

This fund comprises a bequest by Mr C E Hecht, who died in 1942, of which the income was available to provide a Prize of books for the best student of the year in Diploma in Nutrition. In 2005 LSHTM's Council agreed to resume the Award for the nearest successor to the Diploma in Nutrition course, MSc Public Health Nutrition.

The Hooper Prize

The Hooper Prize is awarded annually to the student considered to have submitted the best project on the MSc Public Health for Eye Care course.

The James Busvine Memorial Medal and Prize

The James Busvine Memorial Medal and Prize is awarded for outstanding performance in MSc Medical Entomology for Disease Control.

The award is given in memory of Professor James Ronald Busvine, Emeritus Professor of Entomology and twice Chairman of the World Health Organization Expert Committee on Insecticides. After working as an Entomologist to the Ministry of Health, James Busvine joined the Entomology department of LSHTM as a Lecturer. James worked with Professor Patrick Buxton on new measures to control human lice. His main practical contribution was the development of field tests for the detection and measurement of resistance in insecticides.

The Jerry Morris Prize

The Jerry Morris Prize is awarded annually to an outstanding research student completing a doctoral thesis relevant to health policy, systems and services, or to individual, social, and environmental influences on health.

The award is given in memory of Professor Jerry Morris, Emeritus Professor of Public Health and Honorary Fellow. Jerry Morris was a towering figure in post-war public health who died in 2009, aged 99. Jerry’s work on the link between heart disease and exercise, his involvement with post-war health commissions and his seminal work, Uses of Epidemiology, all helped form this pioneering and inspirational man.

The John Henry Memorial Prize

This prize was set up in memory of a former accepted student on the MSc Control of Infectious Diseases who died tragically before taking up his place.

It is awarded for an outstanding research project that ideally has potential impact on control of infectious disease in Africa.

The John Rivers Prize

The John Rivers Prize is awarded to the student in MSc Nutrition for Global Health who has shown the most promise during the year.

The Prize is founded in memory of John Rivers, for his outstanding contribution and research in human nutrition.

The Langley Memorial Prize

This prize was founded to commemorate Dr Langley’s services as Principal Medical officer of Southern Nigeria. Awarded annually to the writer of the best project report from one of the MScs, written by a student from The Gambia, Sierra Leone, Ghana or Nigeria.

The report should be on tropical medicine or surgery, tropical hygiene and sanitation, or tropical entomology and parasitology.

The Martin Taylor Prize

The Martin Taylor Prize is awarded to a candidate for attaining “outstanding performance” during the course of study of MSc Infectious Diseases by Distance Learning.

The Michael Steward Prize

The Michael Steward Prize is awarded for outstanding performance in MSc Immunology of Infectious Diseases.

The Nand Lal Bajaj and Savitri Devi Prize

The Nand Lal Bajaj and Savitri Devi Prize is awarded for the best project of the year submitted for the examination in MSc Epidemiology.

The Prize was donated by Dr Subhash Chandra Arya, Dip. Bact, PhD, in honour of his parents, Dr Nand Lal Bajaj and Mrs Savitri Devi.

The Norman Noah Prize

The Norman Noah prize is awarded for the best infectious disease epidemiology project.

The Okeke Prize & William Simpson Prize

The Okeke Prize & William Simpson Prize is awarded to the best student on the MSc Public Health for Development course.

This Prize combines a gift from Dr E D Okeke, a former DrPH student from Nigeria in 1964, with money raised in 1937 to the memory of Sir William Ritchie Simpson, visiting lecturer in hygiene at LSHTM 1898–1923 and Director of Tropical Hygiene at the Ross Institute from 1924 until his death in 1931.

The Patrick Buxton Memorial Medal and Prize

The Patrick Buxton Memorial Medal and Prize is awarded for outstanding performance in MSc Medical Parasitology.

The Medal and Prize was founded by relatives of Patrick Alfred Buxton, Professor in Entomology, who died in 1955.

The PSI Andrew Hewitt Prize

The PSI Andrew Hewitt Prize is awarded to the best student on the course in MSc Medical Statistics.

The Prize was founded in memory of Andrew Hewitt, an alumnus of LSHTM and is awarded by the PSI (Statisticians in the Pharmaceutical Industry).

The Reproductive & Sexual Health Research Prize

The Reproductive & Sexual Health Research Prize is awarded to the student who has submitted the best project of the year for examination in MSc Reproductive & Sexual Health Research.

The Prize is awarded by the Centre for Population Studies.

The Selwyn-Clarke Prize

The Selwyn-Clarke Prize is awarded for the best project of year submitted for the examination in MSc Demography & Health.

The Prize has been donated by Sir Selwyn-Clarke in memory of the help given to him by Sir Andrew Balfour, Sir William Johnson and the staff of LSHTM.

The Tsiquaye Prize

The Tsiquaye Prize is awarded annually to the student who has submitted the best virology project of the year for examination in MSc Medical Microbiology.

Dr Kwesi Tsiquaye joined LSHTM in 1962 and was Course Organiser for the MSc in Virology from 1995 until his retirement from the position of Senior Lecturer in Virology in 2004.

This Prize in his name has been established in recognition of his contribution and dedication to postgraduate teaching in virology at LSHTM.

The Woodruff Medal

The Woodruff Medal is awarded each year to an outstanding research student completing a doctoral thesis with preference being given to clinical studies of patients and whose work is likely to lead to the alleviation of suffering in tropical or developing countries.

The Medal is presented in memory of Professor Alan Woodruff (1916–1992) who held the Wellcome Chair of Clinical Tropical Medicine in LSHTM for many years up to 1981.

The Zoe Walker Memorial Prize

The Zoe Walker Memorial Prize is awarded to the student who has demonstrated the greatest understanding of the principles of health promotion, and who has an expected commitment to health promotion practice or research within the MSc Public Health (Health Promotion).

This Prize is awarded in celebration of the work and life of Dr Zoe Walker who was an MSc student in Health Promotion at LSHTM and subsequently carried out valuable research into health promotion for adolescents.

University of London Academic Achievement prize

The University of London Academic Achievement prizes are awarded to students on Distance Learning programmes for overall ‘outstanding performance’.

A Message from the President of the Students' Representative Council

Dearest friends,

Today as we gather to celebrate this milestone, I would like to extend my heartfelt congratulations to each and every one on completion of your masters.

Albert Einstein once said, “In the middle of difficulty, lies opportunity.” The journey was challenging, but we made it!

We were the first graduating batch in the post-pandemic recovery period. We made it through the dilemma of choosing the right modules, the fear of impending industrial action and finding the summer project which best suited our interests. All of us succeeded individually and grew as a community who will continue to contribute to the future of public health worldwide.

In a couple of months since the completion of our course, our batch is already doing incredible work. This includes conducting research on intersection of pandemic preparedness and climate change in The Gambia, presiding over the Society of Medical

Doctors in Malawi, coordinating population-wide study to screen tuberculosis & leprosy in Pacific Islands, and treating malnutrition in children in rural India. With the foundation and support of LSHTM we are embarking on our own unique paths in research, policy, health services and much more.

It has been a pleasure to know you all, and I wish you the very best for your future endeavours.

Dr. Indrani Misra, MD
SRC President 2021/22

Congratulations

Congratulations on graduating from LSHTM and joining the 35,000-strong global community of alumni in more than 180 countries worldwide.

Despite being spread across the globe, our alumni stay close to LSHTM and support each other. You can network with alumni, staff, and students on our alumni portal, LSHTM Connect. Here you can search for friends or alumni in your area, initiate discussions, search and add job opportunities, become or find a mentor, register for events, and keep in touch with the latest news from LSHTM centres and interest groups.

We have dozens of international chapters around the world bringing local LSHTM communities together to socialise and network. Visit the alumni pages of the LSHTM website to see if there’s a chapter in your area, and if not, why not start one? That way, you’ll never be too far from your LSHTM family!

We often hold alumni events to bring together old friends and make new connections. Details can be found online and in our monthly e-newsletters, which you will now receive as an alumnus, so please confirm your contact details via LSHTM Connect or by email – or come and visit the Alumni team stand at today’s ceremony.

Here are just some of the many ways that you can stay connected to the LSHTM community:

- Become a mentor to current students or fellow alumni
- Promote the School as an Alumni Ambassador
- Host or attend an alumni event
- Write for our alumni blog or appear in a vlog
- Raise funds through our exciting community events
- Donate to support future generations of students or advance our pioneering research
- Tell your friends and contacts about studying at LSHTM
- Advance your professional skills on one of our short courses
- Follow and contribute to our social media channels

So do keep in touch and make the most of the benefits and opportunities available to you. We love hearing about where life has taken you since graduating. We regularly feature alumni stories on our blog as we know just how inspiring it is for current and future students to see what career possibilities lie ahead.

We are so proud of you and wish you all the very best for the future – please keep in touch and you are always welcome to come back to see us!

News from LSHTM

LSHTM researchers publish more than 3,000 journal articles every year – many of which make headline news around the world. Here’s a selection of some of our top stories while you were here.

Reducing malaria deaths

Giving young children the RTS,S malaria vaccine and antimalarial drugs before the rainy season led to a significant reduction in life-threatening malaria cases and deaths for over five years, according to a landmark study. The results showed the vaccine-drug combination reduced clinical malaria episodes by nearly two-thirds in settings of highly seasonal transmission.

Global warming

Modelling by Shakoor Hajat and colleagues indicated that over 80% of predicted heat-related deaths in the Middle East and North Africa by the end of the century could be prevented if global warming is limited to 2°C. The study highlighted the urgent need for better adaption policies and a switch to renewable technologies.

COP28 focus on health

LSHTM experts presented a wide range of research on climate and health to policymakers at COP28. Highlights included showing how action could prevent millions of premature deaths; a new global observatory for vector-borne diseases; and the impact of floods and heat on maternal health.

Peter Piot Fellows

Two early career researchers from sub-Saharan Africa have been appointed as the first Peter Piot Fellows focusing on epidemic preparedness and response. The fellowship scheme fosters the professional development of a new generation of specialists in key global health challenges of our time to mark Professor Piot’s tenure as LSHTM Director.

Born too soon

A quarter of babies born in 2020 were born too soon or small for their gestational age, according to a Lancet series by Joy Lawn and colleagues. With these children at a higher risk of death in their first few weeks of life, the research outlined steps needed to ensure that every newborn can have a healthy start in life.

Open access, collaboration & gender diversity

LSHTM has been ranked as the best university in the UK for publishing open access research, for collaborations and for the proportion of academic research with women listed as authors in the 2023 CWTS Leiden Ranking. The School was one of 1,400 universities worldwide included in the ranking.

Award for library team

The Library, Archive & Open Research Services team at LSHTM won the Times Higher Education Outstanding Library Team award for going above and beyond to make research more accessible. The team was praised for its open access research and commitment to equity, diversity and inclusion.

Invest in the Next Generation of Future Health Leaders

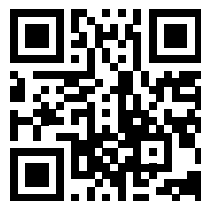

Celebrating the success of graduation by opening the door for others to succeed is one of the most impactful ways that you can help improve global health equity.

At LSHTM, we know that finance can represent a barrier to learning, and so we welcome support to help create access to educational opportunities for promising students, regardless of their background. Through the generous contributions of our dedicated alumni and friends, their families, philanthropists, and other organisations, we aim to grow our capacity to welcome students from around the world, enabling them to realise their potential as tomorrow's health leaders.

In recent years, communities around the world have faced growing challenges to their health, from infectious diseases to climate change and a rise in chronic conditions. Through these challenges, alumni from our School have been at the forefront, providing expert insight and practical guidance.

We hope that as the newest members of our alumni community, you will treasure today's celebration and the time you spent at LSHTM, and that you and your loved ones will consider marking this occasion by helping the next generation of future health leaders who follow in your footsteps.

To learn more about supporting scholarships or other initiatives at LSHTM, please scan the QR code or visit lshtm.ac.uk/donate or get in touch at development@lshtm.ac.uk

“

“Education should not be reserved for those who are fortunate enough to be able to afford it. Your generosity helps to ensure that people like me, who come from less privileged backgrounds, are not excluded, and are given an opportunity to achieve their potential. Without your generous donations to institutions like LSHTM, we will continue to be underrepresented; our voices will not be heard, and our impacts will not be felt”

Matt Harvey
